Advanced and Predictive Analytics Whei-Jen Chen, Rajeev Kamath, Alexander Kelly, Hector H. Diaz Lopez, Matthew

Roberts, Yee Pin Yheng, IBM Redbooks, 2015-12-03 Systems of record SORs are engines that generate value for your business

Systems of engagement SOE are always evolving and generating new customer centric experiences and new opportunities to

capitalize on the value in the systems of record The highest value is gained when systems of record and systems of

engagement are brought together to deliver insight Systems of insight SOI monitor and analyze what is going on with various

behaviors in the systems of engagement and information being stored or transacted in the systems of record SOIs seek new

opportunities risks and operational behavior that needs to be reported or have action taken to optimize business outcomes

Systems of insight are at the core of the Digital Experience which tries to derive insights from the enormous amount of data

generated by automated processes and customer interactions Systems of Insight can also provide the ability to apply

analytics and rules to real time data as it flows within throughout and beyond the enterprise applications databases mobile

social Internet of Things to gain the wanted insight Deriving this insight is a key step toward being able to make the best

decisions and take the most appropriate actions Examples of such actions are to improve the number of satisfied clients

identify clients at risk of leaving and incentivize them to stay loyal identify patterns of risk or fraudulent behavior and take

action to minimize it as early as possible and detect patterns of behavior in operational systems and transportation that lead

to failures delays and maintenance and take early action to minimize risks and costs IBM Operational Decision Manager is a

decision management platform that provides capabilities that support both event driven insight patterns and business rule

driven scenarios It also can easily be used in combination with other IBM Analytics solutions as the detailed examples will

show IBM Operational Decision Manager Advanced along with complementary IBM software offerings that also provide

capability for systems of insight provides a way to deliver the greatest value to your customers and your business IBM

Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and

patterns It empowers business users to define manage and automate repeatable operational decisions As a result

organizations can create and shape customer centric business moments This IBM Redbooks publication explains the key

concepts of systems of insight and how to implement a system of insight solution with examples It is intended for IT

architects and professionals who are responsible for implementing a systems of insights solution requiring event based context pattern detection and deterministic decision services to enhance other analytics solution components with IBM Operational Decision Manager Advanced
