Managerial Issues In Productivity Analysis:

Managerial Issues in Productivity Analysis Ali Dogramaci, Nabil R. Adam, 2012-12-06 A Dogramaci and N R Adam

Productivity of a firm is influenced both by economic forces which act at the macro level and impose themselves on the individual firm as well as internal factors that result from decisions and processes which take place within the boundaries of the firm. Efforts towards increasing the productivity level of firms need to be based on a sound understanding of how the above processes take place. Our objective in this volume is to present some of the recent research work in this field. The volume consists of three parts. In part I two macro issues are addressed: taxation and inflation and their relation to productivity is analyzed. The second part of the volume focuses on methods for productivity analysis within the firm. Finally the third part of the book deals with two additional productivity analysis techniques and their applications to public utilities. The objective of the volume is not to present a unified point of view but rather to cover a sample of different methodologies and perspectives through original scholarly papers.

Productivity Growth and the Competitiveness of the American Economy Stanley W. Black, 2012-12-06 swollen with deutschemarks and yen newly created to purchase unwanted dollars from the markets. When the Bundesbank and the Bank of Japan began to raise their interest rates to slow domestic monetary expansion the fabric of international monetary cooperation began to unravel. Amid charge and counter charge by disgruntled finance ministers the dollar dropped further and interest rates jumped upward leading to panic in the stock market on Black Monday. Fortunately a steady hand and generous supply of credit from the Federal Reserve System prevented massive bankruptcies among Wall Street brokerage houses and a collapse of the credit system. But the world wide reverberations of the Wall Street crash exposed the underlying weaknesses of an economy based on foreign borrowing for all to see. Furthermore the banking system is saddled with mountains of bad debts from the Third World and depressed parts of the American economy. A new Administration entering office in 1989 must deal with these problems among others. Businesses and state and local governments need to know whether to focus their efforts on tax policy investment and improvements in education and worker training or lobbying for protection from imports. The papers in this volume were chosen to explain the causes of present competitive problems in American industry and the factors that can lead to their gradual solution.
