Nineteenth-Century American Women Theatre Managers

Jane K. Curry, 1994-07-21 Many women held positions of great responsibility and power in the United States during the 19th century as theatre managers managing stock companies owning or leasing theatres hiring actors and other personnel selecting plays for production directing rehearsals supervising all production details and promoting their dramatic offerings Competing in risky business ventures these women were remarkable for defying societal norms that restricted career opportunities for women The activities of more than 50 such women are discussed in *Nineteenth Century American Women Theatre Managers* beginning with an account of 15 pioneering women managers who were all managing theatres before 24 December 1853 when Catherine Sinclair often incorrectly identified as the first woman theatre manager in the United States opened her theatre in San Francisco

Women in Asian Management Yimolwan Yukongdi, John Benson, 2013-10-18

According to a recent study by the ILO 2001 women's share of the labour force is increasing worldwide Today women's participation rate in the labour force is over 40 per cent of the global workforce Higher educational levels and falling fertility rates have contributed to this increased participation There is also some evidence that women in some Asian countries may be less marginalised in their advancement into top managerial positions than their counterparts elsewhere As women become more educated and qualified for managerial positions the number of Asian women managers and executives is predicted to rise over the next decade This book examines the opportunities and barriers for women managers in Asia and presents an update on their progress in management This book was previously published as a special issue of the *Asian Pacific Business Review*

Women Managers in American Popular Culture Emanuela Barasch Rubinstein, 2025-07-04

This book explores various portrayals of women managers in American culture from the late 1960s to the present An analysis of iconic films and works of fiction and nonfiction reveals how the image of the woman manager has evolved over time reflecting shifting societal attitudes In early depictions she is an extreme outlier her life revolves entirely around work she rejects family life and she is often hypersexualized In the 1980s a decade marked by the rise of feminist ideals she emerged as a realistic character grappling with challenges that still impact women in management today Yet this progression was short lived At the close of the 20th century and into the early 21st century chauvinistic tropes resurfaced once again casting her in a negative light Contemporary portrayals of the female executive position her as part of a rapidly shifting social landscape She is but one element in an emerging social construct The study of the woman manager is pertinent to the humanities and the social sciences bridging these disciplines This interdisciplinary volume will be of interest to scholars and students in cultural studies gender studies American studies and cinema studies as well as those in economics management and business schools
