Managing Americas Natural Resources:

Native American Natural Resource Management Patricia La Caille John,1993 *Traditional and Modern Natural Resource Management in Latin America* Francisco J. Pichon,John Frechione,Jorge E. Uquillas,1999-10-15 Traditional and Modern Natural Resource Management in Latin America identifies a major problem facing developing nations and the countries and sources that fund them the lack of attention and or effective strategies available to prevent farmers in underdeveloped and poorly endowed regions from sinking still deeper into poverty while avoiding further degradation of marginal environments The contributors propose an alliance of scientific knowledge with native skill as the best way to proceed arguing that folk systems can often provide effective management solutions that are not only locally effective but which may have the potential for spatial diffusion While this has been said before the volume makes one of the best articulated statements of how to implement such an approach In this book which stems from a workshop held in 1995 at the World Bank the editors make an eloquent case for the relevance of risk prone areas as a subject of study and the special role that indigenous knowledge plays in such poorly endowed regions The volume is balanced it does not advocate one approach over another and it is multidisciplinary including work by anthropologists sociologists geographers and natural scientists The nine chapters create a natural progression from conceptual issues to theory applications and synthesis and contain a wealth of data analyses recommendations and carefully considered opinions by experts who have been intimately involved over the long term in theoretical and practical work related to systems of natural resource management in Latin America The volume addresses the topic of sustainability in a logical manner considering practical concerns and lessons as well as theoretical perspectives A number of conceptual and case studies highlight approaches that might succeed if World Bank and other multilateral and national funding sources are forthcoming Traditional and Modern Natural Resource Management in Latin America addresses a topic that has gained worldwide interest especially in relation to indigenous knowledge systems **The War for America's Natural Resources** William R.
