**Managing Competition** Douglas N. Thompson, 1989 **Journal of Economic Literature** , 1991 **The New Common Wealth** Claudiu Adrian Secara, 1997 This book examines in a historical perspective the most intriguing dialectic in the Soviet Union's evolution from socialism to capitalism and back to socialist capitalism. It provides a unique interpretation of events unfolding in Eastern Europe within broad historical economic, military, and political contexts. The author predicts that the United States bastion of free markets will be forced to move toward socialistic policies just as the Communist nations inevitably integrated more elements of capitalism into their systems and he speculates on how these shifts will affect the main players' positions in the global power game. Will U.S. government bailouts bring the U.S. closer to socialism? Were Roosevelt's policies socialistic? Are there limits to the capitalist model and is there a place for unemployment benefits, Social Security pensions, health insurance, and food stamps? If so, why is the safety net feared as un-American?

**Managing the Global Economy** Jonathan Michie, John Grieve Smith, 1995 This book examines current issues in the world economic order and asks what new initiatives are necessary to ensure stability, growth, and high levels of employment.
