Managing and Leading Innovation in Health Care Elizabeth Howkins, Cynthia Thornton, 2002 This book focuses specifically on the importance of leadership and innovation for effective nursing practice The cultural shift that is needed to drive the modernisation agenda raises the importance of leadership for nursing to enable the profession to grasp the opportunities and make a difference to healthcare This book aims to be unique in its linkage of theory with practice by using application from real case studies supplied by practitioners and supported by sound and relevant theoretical material

Leading Innovation and Change in the Health Service George Boak, 2002-05-06 This book is for anyone who is interested in the leadership and management of the National Health Service at the start of the 21st century At a time when the NHS the biggest organisation in the UK is facing massive change through modernisation the authors represent the positive and constructive approaches many clinical leaders and senior managers are taking to become better leaders It is hoped that the book will contribute to a better understanding of the need to work with complexity and change in a radically different way The separate chapters of this book have been contributed by practitioners who are or who have recently been senior managers and professionals in the National Health Service They have been asked to write for people like themselves practical experienced contributors to the NHS who know there are no instant solutions no magic cures and are prepared to spend a little time standing back for a moment from the bustle of immediate demands to understand the patterns and the problems and the possibilities of leadership in the health service Clinicians and managers in the UK healthcare system have been subjected to a relentless stream of changes imposed by one political initiative or another over the past twenty years This has made some practitioners passive Even at senior levels in some organisations we find managers who say I can't influence strategy I can't lead I can't innovate I'm told what to do In these challenging times we believe that healthcare organisations need more than ever people who are prepared to take what opportunities they can find to lead rather than just to follow who are prepared to develop the new ideas and practices that will shape their organisations These leaders are needed at every level Those at the top of the organisation's structures have the added responsibility of creating sufficient space for leaders at lower levels to be able to take action Effective leadership is not the business of minutely directing the behaviour of others as many of our contributors make clear Effective leadership in modern healthcare is more about working well in partnership influencing others and also being prepared to influence working cooperatively rather than in competition

Innovation Leadership Tim Porter-O'Grady, Kathy Malloch, 2010-03-18 This unique text integrates a variety of viewpoints on leadership attributes and abilities that guide organizations and people through the process of advancement to successful innovation outcomes This contributed text integrates a variety of viewpoints on leadership from both healthcare and business settings and provides the tool sets necessary to ensure successful innovation Back cover *The Innovation Imperative in Health Care Organisations* Peter Spurgeon, Cary L. Cooper, Ronald J. Burke, 2012-01-01 Healthy organisations are twice as likely to get better results than unhealthy ones and this could be a matter of life and death if your business is healthcare Whatever way you look at it HR has a key role to play and the authors once again points the way Clare Chapman Group People Director BT British Telecoms If healthcare systems around the world are to respond to the growing demands of an ageing population and advances in technology then healthcare workforces will need to be managed with imagination agility and innovation This important book sets out some of these challenges in a thoughtful and accessible way allowing the reader to tap into the research pedigree of its authors and to draw out lessons and evidence which will inform both strategy and

practice Stephen Bevan Director Centre for Workforce Effectiveness The Work Foundation This insightful book discusses vital concepts of system sustainability in terms of productivity quality improvement innovation and cost control in the context of maximising the potential of staff in the health care sector through effective human resource management Health systems in the western world face increasingly intense pressure to contain or reduce costs while countries such as China and India move towards universal coverage The contributors illustrate that radical gains in efficiency and innovative practice are required internationally in health care systems They argue that the high proportion of health care system costs invested in staffing place the human resource function at the forefront of meeting this challenge Sustained system change and productivity gains more effective management of staff and work climate are essential elements of reform and are all covered in this book The book provides practical examples as to how health service managers can rise to the challenge of sustaining services against greater pressures than ever before It will strongly appeal to academics and students of health service management and public sector management Health service managers HR professionals in health as well as clinical staff will also find plenty of informative information in this enriching compendium
