**Educational Leadership & Learning** Law, Sue, Glover, Derek, 2000-02-01 Within the context of learning age and the Teacher Training Agency's National Standards this book explores many of the key issues facing those both aspiring to and already involved in leadership and management whether at middle or senior levels It also evaluates issues central to leadership in a variety of professional educational settings *Educational Leadership And Management: Developing Insights And Skills* Coleman, Marianne, Glover, Derek, 2010-04-01 Demonstrates the insights and skills needed by leaders in education in an increasingly diverse society This book integrates theory with practice by presenting a real life scenario in each chapter It promotes an ethical stance based on values of social justice and equity with a strong focus on cultural diversity *The Changing Dynamics of Higher Education Middle Management* V. Lynn Meek, Leo Goedegebuure, Rui Santiago, Teresa Carvalho, 2010-07-16 Known as either soft or hard managerialism new managerialism or new public management this new narrative has irrespective of moniker permeated the institutions of higher education almost everywhere Taking this as its context this volume is founded on a comprehensive international comparative analysis of the evolving role of middle level academic managers deans heads of department and their equivalents The chapters address key questions that will determine the future of academe have the imperatives of management theory caused a realignment of the values and expectations of middle level academic managers In what way do the new expectations placed on this group shape the academic profession as a whole And whose interests do middle level academic managers represent Based on material presented at one of the high level Douro Seminars on research into tertiary education this volume systematically combines theoretical views with empirical analysis It argues that managerialist pressure has resulted in changes in the way academic performance is measured There has been a shift in criteria away from research reputation teaching and scholarship to the measurement of performance based upon management capacities This has given middle level academic managers a pivotal role halfway between the predilections of high level decision makers and the maintenance of academic values and control The enhanced expectations and more defined functions of middle level academic managers are in clear contrast to earlier times when the position was considered a public spirited rite of passage for career minded academics Despite this the contributors to this book believe that the middle level managers in the ten countries examined are neither corporate lackeys nor champions of academe It is becoming increasingly clear that the ability of organisations to achieve their aims is largely dependent on the skill and dedication of middle managers Past studies of organisational dynamics have been preoccupied with the executive level of management This text which will be of great interest to researchers and policy makers alike attempts to redress the balance *Theories of Educational Leadership and Management* Tony Bush, 2010-11-30 In this established text Tony Bush presents the major theories of educational management and links them to contemporary policy

and practice Leadership continues to be one of the major criteria used to differentiate the models but the author now makes clear links between educational management theories and the main models of leadership The author applies the models to a range of international contexts including both developed and developing countries This relates to global interest in concepts of leadership and management and to an increasing recognition of the need to customize theory and practice to each context and culture rather than adopting a one size fits all approach For the Fourth Edition the essential conceptual models remain New case study material has been added from the full range of education and non school settings from early years through to further and higher education Each chapter now includes key words summary and end of chapter materials including issues for discussion Key terms are defined in text for the non expert reader and all references and relevant key legislation details have been fully updated This book is essential reading for all teachers who aspire to management as well as for experienced leaders on Masters level courses and for those studying school management as part of education studies degrees

**Understanding Language Classroom Contexts** Martin

Wedell,Angi Malderez,2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of

implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed

Practitioner Research in Education David Middlewood, Marianne Coleman, Jacky Lumby, 1999 This is a very simple but notable piece of work they have done a service to education in providing evidence and there is remarkably little elsewhere that continuous professional development does pay off in terms of a better education for pupils in schools School Leadership and Management Much debate currently concerns the value of education research how is it perceived by practitioners and students How useful and relevant is it Who best carries it out Can it be free from political influence While practitioner research is widely advocated little is known about its effect on individuals teams and the institution In Practitioner Research in Education the au
