## **Managing Coastal Erosion:**

*Managing Coastal Erosion* National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Marine Board, Water Science and Technology Board, Committee on Coastal Erosion Zone Management, 1990-01-01 More and more of the nation's vast coastlines are being filled with homes and vacation resorts. The result is an increasing number of structures built on erosion-prone shores with many of these structures facing collapse or damage. In response to mounting property losses, Congress has given the Federal Emergency Management Agency responsibility for incorporating coastal erosion into its National Flood Insurance Program (NFIP). This book from the National Research Council addresses the immediate question of how to develop an erosion insurance program as well as the larger issues raised by the continually changing face of our nation's shorelines. *Managing Coastal Erosion* explores major questions surrounding a national policy on coastal erosion: Should the federal government be in the business of protecting developers and individuals who build in erosion-prone coastal areas? How should such a program be implemented? Can it prompt more responsible management of coastal areas? The volume provides federal policymakers, state floodplain and resource managers, civil engineers, environmental groups, marine specialists, development companies, and researchers with invaluable information about the natural processes of coastal erosion and the effect of human activity on those processes. The book also details the workings of the NFIP, lessons to be learned from numerous state coastal management programs, and much more.

Coastal Erosion Zone Management,1990      Coastal Erosion Roger H. Charlier,Christian P. De Meyer,2006-04-10 The coastal zone is subject to strong pressures from a large number of users Populations are migrating to it in large numbers Industry wants to exploit it for its space water and manpower Aggregate miners want to exploit mineral resources and health centers are multiplying It is a favorite area for tourism and recreation worldwide The zone can boom economically However coastlines are progressively receding worldwide making the zone fragile vulnerable and unstable The book presents methods of coastal protection and beach restoration and offers solutions to the various problems      *Coastal Erosion and Erosion Management* United States. Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Policy Research and Insurance,1990      Coastal Erosion and Protection in Europe Enzo Pranzini,Allan Williams,2013-03-05 Europe has a long history of managing coastal erosion through a variety of protection strategies from the defences of the Venice lagoons to coastal land reclamation in the Netherlands This book provides a comprehensive review of the entire coastline of Europe and a comparative analysis of erosion problems and solutions in each country Each chapter discusses the natural and anthropogenic factors in the erosion process and in defence projects design and maintenance including coastal morphology and wave climate land use changes and use of coastal areas the evolution of coastal protection climate change and political and administrative assessments Particular attention is paid to demographic and economic factors influencing coastal erosion in each country and to technical and administrative criteria influencing defence projects design Lavishly illustrated in full colour throughout the book represents a definitive reference work on its subject      **Managing Coastal Erosion Through the National Flood Insurance Program** U. S. Government Printing Office (Gpo),2013-07 The United States Government Printing Office GPO was created in June 1860 and is an agency of the the U S federal government based in Washington D C The office prints documents produced by and for the federal government including Congress the Supreme Court the Executive Office of the President and other executive departments and independent agencies The Coastal Zone Information Center CZIC collection provides access to nearly 5 000 coastal related documents that the U S Government Printing Office GPO received from the National Oceanic and Atmospheric Administration NOAA Central Library The collection provides almost 30 years of data and information crucial to the understanding of U S coastal management and NOAA s mission to sustain healthy coasts This is one of their documents      Information for the Committee on Coastal Erosion Zones Management ,1997      *Coastal Erosion Management* Thomas A. **Institutional Arrangements for Managing Coastal Resources and Environments** Jens C. Sorensen, Scott T. McCreary, 1990

*Shoreline Erosion Control* Yves Earhart, AI, 2025-02-18 Shoreline Erosion Control explores nature based solutions for coastal erosion emphasizing how understanding natural processes is crucial for effective coastal management The book highlights the protective roles of tidal barriers like salt marshes which dissipate wave energy and the natural ability of barrier islands to adapt through dune formation and sediment transport Conventional methods often disrupt these natural defenses leading to further ecological damage The book details how beaches and barrier islands respond to erosion showcasing successful cases of nature based solutions worldwide and presents a balanced view of natural and hard engineering approaches It begins with coastal geomorphology principles progresses through tidal barrier functions and concludes with practical coastal management guidelines This work provides valuable insights for coastal managers environmental consultants and students in environmental science earth sciences and geography by integrating field observations lab experiments and long term data to show how to work with nature creating resilient coastlines that protect both property and the environment

*Coastal Hazard Management* Norbert P. Psuty, Douglas D. Ofiara, 2002 As with most shorelines around the world New Jersey beaches are slowly but inexorably being eroded threatening coastal structures and development In some years more sand is deposited than removed but all of the state s monitoring devices show that sea level is gradually rising and pushing the New Jersey shoreline inland The shore is a valuable resource and its natural cultural and economic attractions draw a multitude of permanent and temporary residents each year extending housing and commercial development onto areas that were once swampland Not surprisingly development at the water s edge has been accompanied by an increasing exposure to the natural hazards of the coastal zone erosion flooding and wind damage In this book Norbert Psuty and Douglas Ofiara incorporate perspectives from the areas of coastal sciences economics public policy and land use planning in creating a systematic plan for coastal management and protection It has been more than a decade since New Jersey developed the nation s first state shore protection plan and this volume provides a timely evaluation of its achievements and future challenges This self contained book provides all of the relevant theories models and examples so the reader will not need to refer to any other literature to gain an understanding of the issues and policies surrounding shore protection It is the authoritative handbook for practitioners and policy makers in many fields including coastal science and management and engineering as well as public policy and economics
