

crucial issues in local, state, and national politics. Mayors, legislators, governors, and even presidents have relied on these issues to gain wider public support. Yet, while much has been written on the politics of crime and criminal justice, few scholars have examined the many facets of these subjects with the clarity of Herbert Jacob's most recent book.

Much of *Crime and Justice in Urban America* is devoted to analyzing crime, its victims, the police, and the courts. Its more noteworthy purpose, however, is to integrate into one slender volume recent criminal justice research, much of which relates to major cities throughout the nation, and some of which refutes received wisdom from the past. In separating mythology from reality, Jacob addresses the inevitable interactions between criminal justice and politics. As Jacob shows, related decision making is typically quite complex, especially given fragmented city, suburban, state, and federal governmental structures that exist in most large metropolitan areas.

Some of the more interesting of Jacob's conclusions should be underscored. First, fewer than one out of ten crimes reported to the police are violent in nature. The vast majority of crimes, instead, involve damaged or stolen property. We often think of crime in terms of violence mainly because of the focus and exaggerations of the media. Second, the best single explanation of criminal behavior, Jacob contends, is the huge gap between the economic expectations of young persons as they grow up, and then the realization that high-paying jobs are virtually impossible to find. Hence, individuals "may attribute their failure to society and begin to deny the legitimacy of the social norms that underlie criminal laws" (p. 32). Third, concentrations of wealth and property in cities are natural targets for those who lead a life of crime, and Jacob carefully distinguishes between the types of criminals that function in today's society. As a final example, almost half of all crimes are committed by juveniles. One cardinal problem, therefore, is that the police and the courts "concentrate on offenders whose criminal careers lie more in the past than in the future. Thus, they do not incarcerate the most productive criminals" (p. 188). Case studies of different cities are then used to illustrate these and other traits of crime and the criminal justice process.

Other important "myths" that Jacob endeavors to undermine include the ideas that blacks rarely experience overt discrimination in criminal cases, that plea bargaining does not significantly soften penalties, and that public defenders represent their clients as well as private attorneys do. But these subjects do not receive a great deal of attention, and the book is not well documented regarding Jacob's assertions. Consequently, in

some instances the reader is forced to choose between past studies that have indicated opposite conclusions, and Herbert Jacob's beliefs concerning the latest trends in criminal justice.

Although the book's title suggests otherwise, significant attention is also paid to the civil justice process. Data are introduced showing that most civil cases involve evictions, personal injuries, and disputes between citizens and local governmental agencies. Civil dispute processing is explained in terms of avoidance, negotiation, mediation, arbitration, and adjudication. Again, case studies are relied upon to indicate the chief characteristics of civil justice in the United States.

In light of the stated purposes of *Crime and Justice in Urban America*, Herbert Jacob has largely accomplished his goals. However, although Jacob often sympathizes with those denied criminal and civil justice, he rarely suggests reforms that would move the nation toward its more democratic ideals. Indeed, the book is laced with an underlying theme of pessimism. For instance, cities are portrayed as having "little effective control over the delivery of justice. . ." (p. 188). Police activities are particularly singled out as having only a limited impact on crime rates. And with respect to civil law, "cities play a surprisingly modest role in assuring civil justice" (p. 190). One can only hope that the prospects for criminal and civil justice in America are not as bleak as Jacob seems to paint them.

Managing Community Development in the New Federalism. By Donald F. Kettl. (New York: Praeger Publishers, 1980. Pp. xi + 159. \$19.95.)

Donald Kettl's study is quite timely, given the strong interest in continuing and expanding "New Federalism" programs during the Reagan years—especially block grants.

Basically, Kettl's book addresses two fundamental questions facing students of the federal system: Can the decentralization of federal programs adequately target scarce resources to solve national problems? Do local governments have the wherewithal to manage complex programs without federal guidance? Kettl's tentative answer to both of these questions is: "Perhaps!" However, he argues, it depends on the level of expertise (and indirectly, political leadership) available locally.

In *Managing Community Development in the New Federalism*, Kettl documents the performance of four cities struggling to implement eight community development block grant (CDBG)

make government work better few understand public bureaucracy sufficiently well to offer useful suggestions either theoretical or practical In fact some consider bureaucratic efficiency incompatible with democratic government Douglas Yates places the often competing aims of efficiency and democracy in historical perspective and then presents a unique and systematic theory of the politics of bureaucracy which he illustrates with examples from recent history and from empirical research He argues that the United States operates under a system of bureaucratic democracy in which governmental decisions increasingly are made in bureaucratic settings out of the public eye He describes the rational selfinterested bureaucrat as a minimaxer who inches forward inconspicuously gradually accumulating larger budgets and greater power in an atmosphere of segmented pluralism of conflict and competition of silent politics To make the policy process more competitive democratic and open Yates calls for strategic debate among policymakers and bureaucrats and insists that bureaucrats should give a public accounting of their significant decisions rather than bury them in incremental changes He offers concrete proposals applicable to federal state and local governments for simplifying the now chaotic bureaucratic policymaking system and at the same time bolstering representation and openness This is a book for all political scientists policymakers government officials and concerned citizens It may well become a classic statement on the workings of public bureaucracy

Sharing Power Donald F. Kettl, 2011-07-01 In the flush of enthusiasm to make government work better reformers from both left and right have urged government to turn as many functions as possible over to the private sector and to allow market competition instill efficiency and choice In fact government has been doing just this for years every major policy initiative launched since World War II has been managed by public private partnerships Yet such privatization has not solved government's problems While there have been some positive results there has been far less success than advocates of market competition have promised In a searching examination of why the competition prescription has not worked well Donald F. Kettl finds that government has largely been a poor judge of private markets Because government rarely operates in truly competitive markets contracting out has not so much solved the problems of inefficiency but has aggravated them Government has often not proved to be an intelligent consumer of the goods and services it has purchased Kettl provides specific recommendations as to how government can become a smart buyer knowing what it wants and judging better what it has bought Through detailed case studies Kettl shows that as market imperfections increase so do problems in governance and management He examines the A 76 program for buying goods and services the FTS 2000 telecommunications system the Superfund program the Department of Energy's production of nuclear weapons and contracting out by state and local governments He argues that government must be more aggressive in managing contracts if it is to build successful partnerships with outside contractors Kettl maintains that the answer is not more government but a smarter one which requires strong political leadership to refocus the bureaucracy's mission and to change the bureaucratic culture
