Managing Creativity In Science And Hitech:

Managing Creativity in Science and Hi-Tech Ronald Kay, 2012-05-30 Addressing the issues unique to managers of creative technical staff this guide reflects not only Ronald Kay's long experience observing and teaching successful management techniques but also treats the expanding challenges due to increasingly globally based projects and staff. As before Kay's guide helps readers to prepare themselves graduate students and others to understand and improve their managerial skills and covers such practical yet sometimes overlooked steps such as individual and team behavior of creative technical staff managing their own and others R hiring evaluating and compensating technical staff R and presentations meetings and organizational culture. New to this edition are a chapter on the global impact of high tech enterprises and sections on the roles of foundations and government funding and task force participation. Also tackled are the basics of starting financing and staffing venture capital funded enterprises. What's more this book also serves to increase the awareness and knowledge base of anyone who needs to meet the challenge of managing people with the creative energies that drive technologically based economic growth.

Managing Innovation John C. Huber, 2001 This book is filled with practical advice for inventors and managers. It charts the course from ideas and needs through selecting the best projects and turning them into successes. Also the exclusive Inventor Profile is a powerful tool for identifying people with the most inventive potential. It comes from the most productive inventors in the U S. There are 45 figures and tables all backed up with new methods of research and analysis. Yet the style is direct and highly readable.

Managing Networks of Creativity Fiorenza Belussi, UDO HERMANN STABER, 2012-02-27 The aim of the *Managing Networks of Creativity* is to improve our understanding of creativity and the management of creativity as discussed in the fields of management including strategic management organization science organizational behaviour and entrepreneurship economics sociology regional studies and political science. While research on creativity has made several important contributions to the theoretical literature little attention has been paid to the development and testing of formal theoretical models especially in those cases where creativity is the result not so much of individual behaviour than the outcome of collective efforts connecting individuals in organizations social networks projects geographic clusters and so forth. The proposed volume includes studies both conceptual and empirical which as a whole deconstruct the concept of creativity and the management of creativity by identifying specific situations contexts firms clusters and districts in which creative processes evolve. The reader is provided with in depth discussions of theoretical issues and a range of descriptive cases and survey data that the authors use to explore or test concepts and models. Overall the volume aims to integrate current debates concerning the role of creativity and innovation in economic and social development.
