The Mind-Game Film Thomas Elsaesser, 2021-03-28 This book represents the culmination of Thomas Elsaesser's intense and passionate thinking about the Hollywood mind game film from the previous two decades. In order to answer what the mind game film is, why they exist, and how they function, Elsaesser maps the industrial, institutional challenges and constraints facing Hollywood and the broader philosophic horizon within which American cinema thrives today. He demonstrates how the persistence of Hollywood continues as it has adapted to include new twists and turns, as well as revisions of past concerns, as film moves through the 21st century. Through examples such as *Minority Report*, *Mulholland Drive*, *Source Code*, and *Back to the Future*, Elsaesser explores how mind game films challenge us and play games with our perception of reality, creating skepticism and self-doubt. He also highlights the mind game film's tendency to intervene in a complex fashion in the political moment by questioning the dominant power's intent to program both body and mind alike. Prescient and compelling, *The Mind Game Film* will appeal to students, scholars, and enthusiasts of media studies, film studies, philosophy, and politics.

Daily Mail: It's well known that to reach the top in elite sport, you need to have spent years honing and perfecting your physical ability. However, this is only part of the template required to win; the other half is about mind games. Throughout her career as one of the world's top athletes, Annie Vernon struggled with existential questions about the purpose of sport in our comfortable first-world society. Why do we do it? Drawing on her personal experiences and interviews with some of the best coaches, athletes, and psychologists from across the world of sport, including Lucy Gossage, Katherine Grainger, Matthew Pinsent, Brian Moore, Brian Ching, and Dr Steve Peters, Annie discovers the secrets of how athletes train their brains in order to become world beaters. [Making Sense of Mind-Game Films](#) Simin Nina Littschwager, 2019-06-27 Mind game films and other complex narratives have been a prominent phenomenon of the cinematic landscape during the period 1990 2010 when films like The Sixth Sense Memento Fight Club and Source Code became critical and commercial successes often acquiring a cult status with audiences With their multiple story lines unreliable narrators ambiguous twist endings and paradoxical worlds these films challenge traditional ways of narrative comprehension and in many cases require and reward multiple viewings But how can we make sense of films that don't always make sense the way we are used to While most scholarship has treated these complex films as narrative puzzles that audiences solve with their cognitive skills Making Sense of Mind Game Films offers a fresh perspective by suggesting that they appeal to the body and the senses in equal measures Mind game films tell stories about crises between body mind and world and about embodied forms of knowing and subjective ways of being in the world Through compelling in depth case studies of popular mind game films the book explores how these complex narratives take their embodied spectators with them into such crises The puzzling effect generated by these films stems from a conflict between what we think and what we experience between what we know and what we feel to be true and between what we see and what we sense
