POSTHUMAN SPACE IN MARIO PETRUCCI AND ALICE OSWALD'S POETRY Seçil ERKOÇ IQBAL,2025-09-01

Drawing on recent posthumanist theories that promote a non anthropocentric perspective this study examines the works of contemporary British poets Mario Petrucci and Alice Oswald It is argued that their poetry can be described as posthuman poetry which envisions posthuman spaces of becoming where human and nonhuman worlds coexist on a non hierarchical basis Petrucci s engagement with ecocritical crises in the Anthropocene underscores the limits of human agency and it foregrounds destructive impact of human actions on the ecosystem In a posthuman context therefore Petrucci problematises the human nonhuman binary by representing the erosion of the anthropocentric worldview in the face of environmental crises such as deforestation global warming and the Chernobyl nuclear disaster in *Bosco* 1999 *Heavy Water* A Poem for Chernobyl 2004 and *Half Life Poems for Chernobyl* 2004 In these collections challenging the perception of nonhuman matter as passive Petrucci emphasises the agency of trees and radioactive particles Similarly Alice Oswald moves the reader beyond the human centred treatment of the natural world Rejecting human exceptionalism Oswald s *Dart* 2002 presents a polyphonic meshwork where the voices of alternating human speakers and the River Dart interweave within a posthuman space Representing the intersubjective and dialogic exchanges between the human and nonhuman inhabitants of the Severn Estuary and the lunar cycle Oswald s *A Sleepwalk on the Severn* 2009 further problematises the subject object binary by creating a posthuman space of becoming grounded in a communicative framework Hence bringing Petrucci and Oswald together this study draws attention to trans corporeal and polyphonic entanglements of human nonhuman subject object and self other non binaries and it aims to show how poetry as a literary medium can contribute to questioning and transforming the anthropocentric vision of humankind in the contemporary world [Lives to Remember](#) Peter Underwood,Leonard Wilder,1975-01-01 It is claimed that the trauma of birth leaves an unconscious memory and it is likely that any previous lives would leave similar memories which too can be recalled under hypnosis This book is a fascinating and true story of apparent regression a return to the reactions that belong to an earlier state of development Under hypnosis Peggy Bailey an ordinary housewife relives three completely different lives From the very human story that led to the first regression experiment fortuitously recorded on tape and the first meeting with eighteenth century Sally Fraser in Devon through Liza Bloggs in the nineteenth century and Lady Alice Browning in the early part of the present century the account leaps forward sixteen years when further regressions to these former lives are attempted with exciting results The dual authorship of the book has resulted in an original and unique case book the trained hypnotist describing verbatim each hypnotic session followed by separate assessment and discussion by the established psychical researcher Investigation is undertaken on the basis of material obtained and such problems as self delusion hypnotic influence psychic memories and multiple role taking are

carefully considered The book is a valuable contribution to the growing literature on the subject of reincarnation and is likely to become a classic of its kind. Psychical researchers, reincarnationists, hypnotists, psychologists, and the general reader will find *Lives to Remember* a book to read and read again, a book that is different, a book that is true, and a book that breaks new ground and opens new doors. For the first time, one book presents a full and factual story of a person regressed by a competent hypnotist, and the results assessed by an acknowledged psychical researcher. It is the first example of regression to previous lives with an interval of sixteen years between each repeated experiment.
