Reminiscences of Los Alamos 1943-1945 Lawrence Badash, J.O. Hirschfelder, H.P. Broida, 1980-08-31 Although the World War II efforts to develop nuclear weapons have inspired a very large literature it struck us as noteworthy that virtually nothing existed in the form of firsthand accounts Now It Can Be Told by General Leslie Groves the Manhattan Project's military commander is probably the most prominent exception but the scientists themselves seem to have shown little interest in publishing their reminiscences Believing that it would be not only worthwhile for posterity but extremely interesting for the present generation to hear about the aspirations fears and activities of those who participated in this watershed of science and government collaboration we arranged the public lecture series represented by this book We chose to focus upon Los Alamos since the project's efforts culminated there The isolated laboratory in New Mexico was created to design and construct the first atomic bombs More scientific brainpower was accumulated there than at any time since Isaac Newton dined alone and the interactions with this community are of sociological interest as the results of their work are of political import *Los Alamos and the Pajarito Plateau* Sharon Snyder, Toni Michnovicz Gibson, Los Alamos Historical Society, 2011-08 The story of Los Alamos and the Pajarito Plateau begins with explosive eruptions An ancient volcano in northern New Mexico created the mountainous region known as the Jemez and with time erosion sculpted narrow mesas and canyons The first residents were Native Americans One of their many pueblos was called Tsirege or the bird place from which the name Pajarito originates meaning little bird in Spanish Homesteaders arrived in the 1880s but the area was sparsely settled In 1917 former Rough Rider Ashley Pond started the exclusive Los Alamos Ranch School in the isolated setting but in 1942 the US government took an interest in that isolation They abruptly closed the school and Los Alamos
