Conservation and the City Peter Larkham,2002-03-11 It is a widely held belief that cities must change or they will wither and die One of the key problems of urbanization is how to cope with these changes while retaining the structures constructed and maintained by previous generations Conservation and the City is a study of conservation and change throughout the built environment city centres suburbs and even tiny villages and how the activities of conservation interact with the planning system Using detailed case studies from Britain and the Westernized world the author examines some of the key social economic and psychological ideas which support conservation as well as studying the urban landscape and the agents of change Conservation and the City seeks to understand urban conservation and in doing so presents possible solutions for managing change in the built environment of the future

Whitehall Colin Brown,2009-05-05 WHITEHALL the name of a street now synonymous with the civil service has been the centre of British religious and political power for over 500 years Whitehall takes the reader behind closed doors to explore the fascinating history that lies behind the facade of the great departments of state and some of the greatest figures in British history including Henry VIII's playground the execution of Charles I Nelson's tortured love life and Winston Churchill's plans for a last stand against the forces of Hitler's Nazi invaders It explores the private house in Whitehall ignored by tourists today which became the most notorious address in London when Byron and Lady Caroline Lamb conducted their very public and tempestuous love affair there Inside Admiralty House screened from public view is the elaborately decorated boardroom

equipped with its own wind clock where Nelson received his orders to attack the French There is also the dining room where Nelson fumed over dinner with his wife Fanny who burst into tears at his black mood Fragments of the tennis courts where Anne Boleyn watched Henry VIII playing tennis in his slops have survived behind the walls of the Cabinet Office at 70 Whitehall Beyond its glass doors a secret passageway leads to Number Ten Downing Street Cabinet papers reveal that Winston Churchill planned to use Whitehall as a fortress in 1940 when Britain faced imminent invasion by Hitler's Nazi forces The documents published for the first time show how Churchill prepared for street fighting in Whitehall's departments as he made his final stand And it also reveals for the first time the films that helped Churchill escape the rigors of war in his underground cinema at Whitehall as the Prime Minister battled to preserve Britain for another 1 000 years

Art Markets in Europe, 1400-1800 Michael North, David Ormrod, 2016-12-05 The reinvention of art history during the 1980s has provided a serious challenge to the earlier formalist and connoisseurial approaches to the discipline in ways which can only help economic and social historians in the current drive to study past societies in terms of what they consumed produced perceived and imagined This group of essays focuses on three main issues the demand for art including the range of art objects purchased by various social groups the conditions of artistic creativity and communication between different production centres and artistic milieux and the emergence of art markets which served to link the first two phenomena The work draws on new research by art historians and economic and social historians from Europe and the United States and covers the period from the late Middle Ages to the early nineteenth century

Matériel Culture Colleen M. Beck, William Gray Johnson, John Schofield, 2003-09-02 Matériel culture encompasses the material remains of conflict from buildings and monuments to artefacts and militia as well as human remains This collection of essays from an international range of contributors illustrates the diversity in this material record highlights the difficulties and challenges in preserving presenting and interpreting it and above all demonstrates the significant role matériel culture can play in contemporary society Among the many studies are the culture of shells the archaeology of nuclear testing grounds Cambodia's killing fields the Berlin Wall and the biography of a medal the reappearance of Argentina's disappeared World War II concentration camps

The Forest, Park and Palace of Clarendon, C. 1200-c. 1650 Amanda Richardson, 2005 Reconstructing an actual conceptual and documented Wiltshire landscape The main argument of this thesis is that the landscape and locality of Clarendon Forest and Park some 6 km east of Salisbury Wiltshire England were strongly influenced by the presence or later absence of Clarendon Palace which fell into decay in the late fifteenth century The first sure evidence of a royal residence at Clarendon dates from the reign of Henry I 1100-1135 although the site may well have Saxon connections A primary aim of this work is to restore the wider conceptual landscape by considering the forest alongside the relict landscape of the park and it is argued throughout that because medieval forests are archaeologically elusive the best way to achieve this is through an intensive documentary methodology Attention is drawn throughout to the capacity of documents to illustrate how estates were

managed over time The argument representing an unprecedented systematic study of manuscript sources for Clarendon Park and Forest held at central and regional record offices is supported by references to printed primary sources It has resulted in the compilation of a main computer database listing over 800 relevant documents held at the Public Record Office alone from which those that might prove most useful were selected and transcribed The transcriptions arranged by subject form several substantial and searchable electronic databases facilitating cross checking and comparison The written sources themselves have informed the structure of the work and help to illustrate that this unique landscape and locality was indeed profoundly influenced by the existence of a royal park and palace at its centre Nevertheless what has emerged strongly in the course of the study are the myriad ways in which the forest in turn shaped the lifecycle of the palace

The Spirit of Britain Roy Strong, 2000 The Spirit of Britain is a masterly survey of the country's arts literature music poetry painting architecture theater and all the related subjects that over the centuries have given British intellectual and cultural life its unique character and vitality Presented to the reader as a single unfolding narrative from the Celts to the present day the arts are set within a vivid panorama of the social economic political and ideological forces that shaped them 400 gorgeous photographs and works of art add immensely to the dramatic impact of this landmark work of cultural history

Tomb Destruction and Scholarship Phillip Lindley, 2007

Spenser Studies, 1991

The Medieval Cathedral of Trondheim Margrete Syrstad Andå, 2007 Medieval cathedrals and the various practices connected to them form an important and complex part of the European cultural heritage The buildings themselves and their reception into the modern arts ensure their presence within today's cultural memories and sensibilities In the mid twelfth century a new archbishop's seat was erected in the Norwegian city of Trondheim or Nidaros at the far north of Europe This interdisciplinary volume written by scholars of history architecture and liturgy explores the medieval cathedral of Trondheim as a local construction in a European context As a see of the Western Church it was set in an international Latinate culture At the same time the construction of the building itself and the ritual practices in and around it were influenced by local political religious and cultural conditions The relationship between the physical construction of a cathedral and its function in medieval liturgical and other ritual practices is a topic of wide relevance for architectural and liturgical scholarship The so called Ordo Nidrosiensis the thirteenth century ordinal of the Province of Nidaros is an immense help in interpreting the architectural construction and sacred space of Nidaros Cathedral and the Ordo is dealt with in many of the articles In accordance with general medieval practice the Nidaros ordinal may be described as international in contents but edited with regard to local considerations
