Lost World Of The Craft Printer:

The Lost World of the Craft Printer Maggie Holtzberg, 1992 She finds that a significant number of printers independently developed similar responses to the deskilling of their craft and the threat of unemployment Demonstrating a widespread consistency in themes and expressive forms in the printers occupational narratives Holtzberg Call shows that what once served as the printers rhetoric of tradition is now their rhetoric of displacement Initiation rites long apprenticeships a complex and peculiar jargon and a gallery of legendary figures once bound hot metal printers into a specialized highly regarded occupational folk community The hot metal printers lore has survived in an exemplary form that functions as a source of reconciliation with the demise of their craft Holtzberg Call analyzes how and why the printers traditionalize and idealize their work experience drawing parallels between the shift from mechanical to computer typesetting and an equally disconcerting transition in the nineteenth century when Linotype deposed handset type She also shares her knowledge of the many aspects of hot metal printing culture from the life of the tramp printer to the meanings of various printing terms to the operation of a Linotype machine One gains a sense of the conditions in the old type shops where long hours excessive heat and poorly ventilated fumes from solvent ink and molten lead were the crucible in which camaraderie pride and fulfillment were forged

The Lost World of the Craft Printer Maggie Holtzberg, 1992 *Gutenberg in Shanghai* Christopher A. Reed, 2011-11-01 In the mid 1910s what historians call the Golden Age of Chinese Capitalism began accompanied by a technological transformation that included the drastic expansion of China's Gutenberg revolution Gutenberg in Shanghai examines this process It finds the origins of that revolution in the country's printing industries of the late imperial period and analyzes their subsequent development in the Republican era This book which relies on documents previously unavailable to both Western and Chinese researchers demonstrates how Western technology and evolving traditional values resulted in the birth of a unique form of print capitalism whose influence on Chinese culture was far reaching and irreversible Its conclusion contests scholarly arguments that view China's technological development as slowed by culture or that interpret Chinese modernity as mere cultural continuity A vital reevaluation of Chinese modernity Gutenberg in Shanghai will be enthusiastically received by scholars of Chinese history and by specialists in cultural studies political science sociology the history of the book and the anthropology of science and technology
