Lost Homelands Audrey Goodman, 2022-02-08 Before the 1930s landscapes of the American Southwest represented the migrant's dream of a stable and bountiful homeland. Around the time of the Great Depression, however, the Southwest suddenly became integrated into a much larger economic and cultural system. Audrey Goodman examines how since that time these southwestern landscapes have come to reveal the resulting fragmentation of identity and community. Through analyzing a variety of texts and images, Goodman illuminates the ways that modern forces such as militarization, environmental degradation, internal migration, and an increased border patrol presence have shattered the perception of a secure homeland in the Southwest. The deceptive natural beauty of the Southwest deserts shields a dark history of trauma and decimation that has remained as a shadow on the region's psyche. The first to really synthesize such wide-ranging material about the effects of the atomic age in the Southwest, Goodman realizes the value of combined visual and verbal art and uses it to put forth her own original ideas about reconstructing a new sense of homeland. *Lost Homelands* reminds us of the adversity and dislocation suffered by people of the Southwest by looking at the ways that artists, photographers, filmmakers, and writers have grappled with these problems for decades. In assessing the ruination of the region, however, Goodman argues that those same artists and writers have begun to reassemble a new sense of homeland from these fragments.

Lost Civilizations Jim Willis, 2019-10-01 Unearthing the scientific evidence, myths, and legends of ancient civilization. The reminders of the Ancients are everywhere. They are saved in remnants in archaeology. They are found in reminiscences in mythology. They are recorded in books, story, song, and stone. Who were these people: aliens, man, or myths? Do we still see their influences today? What remains of these inhabitants of the jungles, lost cities, and dwellings underground, underwater, and beyond? How did they rise? Why did they fall? Will they rise again? From pyramids and underground bunkers to watery graves and ancient astronauts. *Lost Civilizations: The Secret Histories and Suppressed Technologies of the Ancients* examines the archaeological evidence and the traces left behind by more than 70 ancient civilizations, including Atlantis, Gobekli Tepe, Anasazi disappearance in the American Southwest, Nazca Lines of Peru, Turkey's Atlatlh y k, Denisovan Ancestors' departure, Amazon Cities in the Jungle, Neanderthal Ancestors' extinction, The Eden Stories of Theoretical Physics, Underground Cities of the Grand Canyon, and many more. From ancient Egypt, middle America, and the Nubian Desert to the frozen Antarctica, underwater ruins of Asia, and clues of visits by ancient aliens, *Lost Civilizations* explores the unanswered questions about the true origins of man. Might there have been advanced civilizations long before the days of ancient Egypt and Mesopotamia? What do 3D imaging and new underwater mapping technology reveal? What do prehistoric artifacts, architecture, carvings, maps, and monoliths tell us? Were rising waters, erupting volcanoes, catastrophic solar flares, comet or asteroid fragments, or some other unimaginable cataclysmic disasters the death of these advanced civilizations? Touring the world and reviewing the scientific evidence, this fascinating book ties together historical events in one part of the world that

produced actual effects in others Uncovering hidden and suppressed pasts of technologically and culturally advanced ancient civilizations it looks at how modern civilization compares and contrasts to those who have gone before It will leave you with the sense that what has happened to past advanced civilizations might very well be happening again in our own time With more than 120 photos and graphics it is richly illustrated Its helpful bibliography and extensive index add to its usefulness
