A Representation of the Academic Potential of So-Called 'Low' Culture Emma Buchanan, 2020-11-15 Despite or more likely due to being the culture which most affects and interacts with the masses the broad and definition evading category of popular culture remains a second class citizen in academia relegated to a position of low below a culture deemed high and worthy of scholarly inquiry This eclectic collection of essays aims to convince that this inequality must be addressed by exploring a variety of supposedly low cultural types and texts through an academic lens proving that so called low culture can be a valuable contribution to academic research That said raising the low does not mean making it high turning it into an elite category to be accessed only by experts Rather the authors are unswerving in their approach that academic writing and fan writing are not mutually exclusive On the contrary it is their knowledge and passion as fans of their subject matter that has inspired their chapters all of which draw upon their considerable experience of engaging as fans in what they discuss All the

chapters have been written by postgraduate students seeking to inspire a new empiricism through which their interests might be fully pursued in their futures as scholars Emma Buchanan is a British postgraduate researcher and television fan who is currently writing up her PhD thesis on the topic of gender and change in AMC s The Walking Dead as understood from the point of view of Jungian depth psychology Handbook of Robust Low-Rank and Sparse Matrix Decomposition Thierry Bouwmans, Necdet Serhat Aybat, El-hadi Zahzah, 2016-09-20 Handbook of Robust Low Rank and Sparse Matrix Decomposition Applications in Image and Video Processing shows you how robust subspace learning and tracking by decomposition into low rank and sparse matrices provide a suitable framework for computer vision applications Incorporating both existing and new ideas the book conveniently gives you one stop access to a number of different decompositions algorithms implementations and benchmarking techniques Divided into five parts the book begins with an overall introduction to robust principal component analysis PCA via decomposition into low rank and sparse matrices. The second part addresses robust matrix factorization completion problems while the third part focuses on robust online subspace estimation learning and tracking Covering applications in image and video processing the fourth part discusses image analysis image denoising motion saliency detection video coding key frame extraction and hyperspectral video processing The final part presents resources and applications in background foreground separation for video surveillance With contributions from leading teams around the world this handbook provides a complete overview of the concepts theories algorithms and applications related to robust low rank and sparse matrix decompositions It is designed for researchers developers and graduate students in computer vision image and video processing real time architecture machine learning and data mining Increasing Language Skills of Students from Low-Income Backgrounds Celeste Roseberry-McKibbin, 2010-10-26 Applied Video Processing in Surveillance and Monitoring Systems Dey, Nilanjan, Ashour, Amira, Acharjee, Suvojit, 2016-10-11 Video monitoring has become a vital aspect within the global society as it helps prevent crime promote safety and track daily activities such as traffic As technology in the area continues to improve it is necessary to evaluate how video is being processed to improve the quality of images Applied Video Processing in Surveillance and Monitoring Systems investigates emergent techniques in video and image processing by evaluating such topics as segmentation noise elimination encryption and classification Featuring real time applications empirical research and vital frameworks within the field this publication is a critical reference source for researchers professionals engineers academicians advanced level students and technology developers
