Power Elites and State Building Wolfgang Reinhard, 1996 The Origins of the Modern State in Europe series arises from an important international research programme sponsored by the European Science Foundation The aim of the series which comprises seven volumes is to bring together specialists from different countries who reinterpret from a comparative European perspective different aspects of the formation of the state over the long period from the beginning of the thirteenth to the end of the eighteenth century One of the main achievements of the research programme has been to overcome the long established historiographical tendency to regard states mainly from the viewpoint of their twentieth century borders The modern European state defined by a continuous territory with a distinct borderline and complete external sovereignty by the monopoly of every kind of legitimate use of force and by a homogeneous mass of subjects each of whom has the same rights and duties is the outcome of a thousand years of shifting political power and developing notions of the state This major study sets out to examine the processes of state formation and the creation of power elites A team of leading European historians explores the dominant institutions and ideologies of the past and their role in the creation of the contemporary nation state

One Hundred Years of Masochism Michael C. Finke, Carl Niekerk, 2000 Just over a century has passed since the sexologist Richard von Krafft Ebing coined the term masochism in a revised edition of his Psychopathia Sexualis 1890 Put into circulation as part of the fin de siècle process through which sexuality and sexual practices considered deviant became medicalized this suspicious concept grew in

significance and explanatory power in the expanding new context of psychoanalytic discourse Today the study of masochism shows signs of becoming a discipline in its own right the political social and cultural ramifications of which exceed and indeed render problematic traditional psychoanalytic perspectives on the phenomenon The essays in this volume demonstrate however that the concept of masochism still offers a point of entry into psychoanalytic theory that while revealing a number of its most vexing insufficiencies and problematic constructions evokes also a sometimes surprising illuminative potential and capacity to adapt to changing social realities And as the volume s title is meant to suggest the authors represented here tend to agree that the continued rich viability of psychoanalytic theory in cultural analysis is best appreciated and ensured through engaging the theory s own social historical and cultural contexts The volume includes clinical perspectives on masochism and articles on medieval romance Goethe Sacher Masoch Krafft Ebing s Psychopathia Sexualis Turgenev Tolstoy Multatuli Fassbinder and masochism and postmodernism **Structures and Assertions** Thomas Allan Brady, Heiko Augustinus Oberman, James D.
