## **Lucid Waking:**

**Lucid Waking** Georg Feuerstein, 1997-08-01 A noted scholar of Eastern philosophy explains how to make the experience of heightened awareness a part of everyday life and how this can transform the planet. Lucid waking means bringing an intense awareness to the business of living by meeting the challenges of existence sanely, creatively and philosophically. It is the goal of all the great spiritual traditions of the world. Georg Feuerstein shows how this awareness is quietly emerging in individuals in the West after a prolonged spiritual slumber. Lucid Waking shows us that it is possible to be so vividly engaged in life that it will seem as though others are sleepwalking by comparison. Feuerstein brings clarity to the often murky concepts of soul, spirit, imagination, wholeness and enlightenment, providing a sensible accounting of higher consciousness and self-transcendence in modern life as we approach the millennium. Rich with philosophy and insight from one of our most gifted chroniclers of the inner experience, *Lucid Waking* is a statement of unshakable faith in the great potential of humanity.

**Lucid Waking: The Answer to the Problem of Consciousness** Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness. It's fair to say that no academic has any clue at all about what consciousness is. In fact, academics have totally confused it with something radically different, namely, sentience. The problem that faces the academic world is the insurmountable one of how you get lifeless, mindless, purposeless objects, material atoms, to manifest subjectivity. It's a category error to imagine that matter can provide any answers to the foundational issues of mind. Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness. In fact, the problem of subjectivity/sentience is totally different from the problem of consciousness. To understand why, simply ponder all of the following statements: 1. animals are sentient but not conscious; 2. human babies are sentient but not conscious; 3. humans who never encountered another human are sentient but not conscious; 4. sleepwalking humans are sentient but not conscious. The problem of sentience is drastically different from the problem of consciousness, and if you conflate the two, you have immediately set yourself an impossible task, especially if you make any attempt to solve these problems within the framework of materialism, i.e. the ideology of anti-mind. To understand what consciousness actually is, it's essential to understand the difference in the world of sleep between dreaming and lucid dreaming. Exactly the same dichotomy is present in the waking world. A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness. A conscious version of a sleepwalker engages in what we refer to as lucid waking. Lucid waking is the key to consciousness. The fact is that consciousness is not an inherent property of human individuals. It's not built into them. It's acquired, just as some people acquire the ability to become lucid dreamers. Since sleepwalkers could do many of the same things as conscious individuals, the question is invited: why is consciousness required at all? If you don't know what consciousness is, how can you expand your consciousness to the maximum? Wouldn't you like to be maximally conscious? Think of the power you would have. **Lucid Dreaming, Waking Life** Elliot Riley, 2020-06-12 Lucid dreaming the
