Managerial Experience:

The Managerial Experience Lawrence R. Jauch, Sally A. Coltrin, Arthur G. Bedeian, 1989 *Learning Theory in the Practice of Management Development* Sara Grant, Aharon Kfir, Stephen A. Stumpf, Mary Anne Watson, 1998-05-21 The workplace is the ideal environment for tying together management theory and practice and yet classes in many regular management development programs are conducted away from the work site and class sizes are so large that individual instruction is difficult to achieve In this book the authors seek effective ways to merge theory with workplace practice and advocate the modular preceptor method whereby participants work together in dyads and triads with a preceptor acting as advisor and instructor Unlike traditional management development programs which do not usually lead to behavior changes the modular preceptor model has behavior change as the basic aim Participants can remain at work while experiencing individualized learning developing problem solving skills and acquiring new knowledge which can be immediately applied to work situations Various ways of learning such as passive lecture case study discussion and experiential role playing games sensitivity training are examined No single mode of learning can be comprehensive and adequate for all situations The authors contend however that experiential learning is most effective for increasing the will and competence to learn and for using what is learned to change manager behavior The purpose of the modular preceptor approach is not to present answers to specific managerial or organizational problems but to help the participant acquire new problem definition and problem solving skills and the confidence to apply them on the job This book also analyzes the contribution of the behavioral sciences to the philosophies and techniques behind management instruction and examines the role of the university in management development and the future direction of MBA programs For anyone concerned with meaningful and effective management development this book is an invaluable resource *Winning Strategies in a Deconstructing World* Rudi K. F. Bresser, Michael A. Hitt, Robert D. Nixon, Dieter Heuskel, 2000-12-19 The end of the nineteenth century saw the construction of the vertically integrated value chains that came to define modern business The end of the twentieth century witnessed their deconstruction In industries across the economy markets are intruding on the web of proprietary arrangements that have held these chains together As they do the boundaries defining business companies and industries are coming under attack radically transforming the nature of competition Powerful forces such as globalization and deregulation are undermining the logic and practice of traditional vertical integration but the most powerful partly because it acts as catalyst and an accelerator is a revolution in the economics of information This shift in information economics is giving birth to a myriad of new strategic options The consequences of deconstruction for the strategic management of the firm as well as for the firm itself are dramatic Deconstruction forces a fundamental rethinking of some of the basic principles of strategy which will impact on the concepts of the portfolio forms of organizational structure styles of leadership mechanisms for acquiring and managing knowledge and approaches to uncertainty and risk This the latest volume in the Strategic Management Series

explores the implications of the value chain deconstruction for strategy the changes in strategic thinking and the action necessary to cope with the challenges and opportunities Bringing together contributions from key figures in the field of strategy in both practice and academia this book as with other books in the series addresses the ideas and issues at the forefront of strategic management theory and practice *Effective Learning and Teaching in Business and Management* Bruce Macfarlane, Roger Ottewill, Bruce J. McFarlane, 2001 Covering all the key issues of effective teaching of business and management this guide includes chapters from a wide range of contributors in the field and takes a broad and international perspective *The Meritocracy Paradox* Emilio J. Castilla, 2025-09-02 Meritocracy the idea that individuals should be rewarded based on their talent and hard work is one of the most widely celebrated ideals in education business and government It shapes how organizations recruit evaluate and promote promising a fair system where the best rise to the top But meritocracy has increasingly come under criticism for deepening inequality and reinforcing bias How did a once progressive ideal meant to level the playing field end up contributing to unfairness and privilege What happens when organizations treat merit as their guiding principle without questioning how it is defined or applied Most importantly how can today's leaders recognize and fix what is gone wrong In *The Meritocracy Paradox* Emilio J Castilla offers timely new answers to these fundamental questions He analyzes the structure and culture of meritocracy inside organizations providing real world examples from hiring and merit based bonuses in companies to admissions decisions at elite universities to show how personal biases and social barriers can undermine the values and outcomes these systems are meant to uphold Castilla provides practical research backed frameworks to help organizations achieve true fairness and opportunity for all Drawing on successful data based interventions he presents concrete strategies for improving recruitment selection evaluation promotion and compensation processes revealing how motivated leaders can identify and correct shortcomings with cost effective targeted solutions that deliver proven results *The Meritocracy Paradox* is essential reading for anyone seeking to understand and improve the intersection of merit fairness and equal opportunity in organizations **Oversight--Park**
