The Catholic Church and Argentina's Dirty War Gustavo Morello, 2015 Drawing on interviews with victims of forced disappearance documents from the state and the Church as well as field work and participant observation The Catholic Church and Argentina's Dirty War explores how the Argentine government deployed the legitimating discourse of Catholicism to justify terrorism in the case of La Salette missionaries It examines how the official Catholic hierarchy rationalized their silence and how the victims understood their Catholic faith in such a context

Quaternary of South America and Antarctica Peninsula 1998 Jorge Rabassa, Monica Salemmme, 2022-04-18 This text deals with certain geological aspects of the extreme geographical locations of South America and the Antarctic Peninsula Topics include Brazil geology and vertebrate paleontology pleistocene wave built terraces of Northern Rio de Janeiro state and holocene coastal evolution

Evolution of an Andean Margin Suzanne Mahlburg Kay, Víctor A. Ramos, 2006-01-01 The objective of this volume is to examine the Cenozoic tectonic and magmatic evolution from the arc to the retroarc of a distinctive end member of the Andean accretionary orogen between 35 S and 39 S The evolution of the Andes in this region provides an outstanding case study of an orogen where periods of contraction and extension crustal shortening and normal faulting and differences in retroarc volcanism reflect a tectonic regime that alternates in space and time Structural magmatic and paleogeographic patterns correlate strongly with the dynamics of the subduction zone The region includes the Neuquen basin which is one of the most prolific of the Central Andes The tectonic setting is important in understanding hydrocarbon

systems of the sub Andean basin and the potential for ore deposits in the cordillera The book is fundamental for researchers working on tectonics and magmatism in Andean type systems as well as those involved in exploration Publisher's website

Rock Art Studies - News of the World Natalie R. Franklin, Matthias Strecker, 2008-08-05 This is the third in the five yearly series of surveys of what is happening in rock art studies around the world As always the texts reflect something of the great differences in approach and emphasis that exist in different regions The volume presents examples from Europe Asia Africa and the New World During the period in question 1999 to 2004 there have been few major events although in the field of Pleistocene art many new discoveries have been made and a new country added to the select list of those with Ice Age cave art Some regions such as North Africa and the former USSR have seen a tremendous amount of activity focusing not only on recording but also on chronology and the conservation of sites With the global increase of tourism the management of rock art sites that are accessible to the public is a theme of ever growing importance Geology of Cuba Manuel Enrique Pardo Echarte, 2021-05-04 The evolution of geological cartography in Cuba in its more than 135 years of history has been possible through the consultation of numerous archival reports publications maps and personal interviews with different authors and geologists of vast experience A brief critical analysis is made of the increase in the degree of geological knowledge of the country since the elaboration of the Geological Sketch of the Cuban Island at a scale of 1:2 000 000 Fern ndez de Castro 1883 first of Cuba and of Ibero America until the most recent Digital Geological Map of Cuba at scale 1:100 000 P rez Arag n 2016 Cuba and its surroundings are a geological mosaic in the southeast corner of the North American plate with rocks from many different origins from Proterozoic to Quaternary extended along the southern border of the plate From the Eocene this belt has been dissected by several great faults related to the development of some great oceanic depressions Cayman trough and Yucatan basin The fossil record of Cuba which covers approximately the last 200 million years of life on Earth is rich in very varied fossils witnessing a wide diversity of organisms both animals and plants that inhabited the Antillean and Caribbean region and that constitute the inheritance of the biological diversity that the current Cuban archipelago exhibits As a result of the preparation of the Cuban Metallogenic Map at scale 1:250 000 forty one models and eight sub models of metallic mineral deposits were identified These models of descriptive genetic type together with the analysis of their spatial distribution and their relationship with geology allowed the identification and mapping of ten mineral systems linked to the geodynamic environments present in the Cuban territory Cuba has large deposits of limestone loam dolomite kaolin gypsum and anhydrite rock salt marbles sands and clays of different types zeolites peat therapeutic peloids and many more There are manifestations of decorative and precious rocks such as jasper jadeite different varieties of quartz and even xylopals A compilation of geochemical data of oceanic basalt samples from previous works together with data of analyzed samples during this study in order to discuss geochemical criteria based on immobile element proxies for fractionation indices alkalinity mantle flow and subduction addition provide a comprehensive ophiolite classification

Ghiglione,Darío L. Orts,Laura Giambiagi,2015-11-27 This book presents recent findings on the structure and evolution of the Southern Andes Through a detailed description of a series of orogenic segments reviewed by the different groups that have worked with structural and geophysical tools in each area over the last several years it illustrates the diversity of mechanisms that have impacted strong orogenic gradients and consequently mountain morphology from the southern Pampean flat subduction zone to the southern tip of the continent 33 56o S The book also revises our conventional understanding of the source of the different Mesozoic to Cenozoic sections exhumed in the orogenic wedge with the objective of discussing basin mechanisms through time A final chapter discusses probable orogenic controls that have acted together in order to explain structure the different deformational stages and intra orogenic extensional collapses that affected the fold and thrust belt over time Borges and the Literary Marketplace Nora C. Benedict,2021-01-01 A fascinating history of Jorge

Luis Borges's efforts to revolutionize and revitalize literature in Latin America Nora Benedict's illuminating book is an essential contribution to the understanding of Borges' relationship to the written word The portrait of Borges as writer and reader is now made complete with Benedict's exploration of Borges as editor Alberto Manguel director Center for Research into the History of Reading Jorge Luis Borges 1899-1986 stands out as one of the most widely regarded and inventive authors in world literature Yet the details of his employment history throughout the early part of the twentieth century which foreground his efforts to develop a worldly reading public have received scant critical attention From librarian and cataloguer to editor and publisher this writer emerges as entrenched in the physical minutiae and social implications of the international book world Drawing on years of archival research coupled with bibliographical analysis Nora C Benedict explains how Borges's more general involvement in the publishing industry influenced not only his formation as a writer but also global book markets and reading practices in world literature In this way she tells the story of Borges's profound efforts to revolutionize and revitalize literature in Latin America through his various jobs in the publishing industry
