Environmental Protection Agency, 2001 **Cases, Materials and Text on Property Law** Sjef van Erp, Bram Akkermans, 2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe s major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the Ius Commune Casebooks this volume clearly

demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe Prime Numbers Richard Crandall, Carl Pomerance, 2005-08-04 Bridges the gap between theoretical and computational aspects of prime numbers Exercise sections are a goldmine of interesting examples pointers to the literature and potential research projects Authors are well known and highly regarded in the field Follies, Orchestrations by Jonathan Tunick, Part 2 Stephen Sondheim, Jonathan Tunick, This edition presents Jonathan Tunick s orchestrations of Stephen Sondheim s musical Follies in full score Follies is set in 1971 the year of its creation at a reunion of the fictional Weismann Follies on the eve of their theater s destruction This scenario gives Sondheim who wrote both music and lyrics the opportunity to create what amounts to two interlocking scores One explores the thoughts and interactions of the guests the music often revealing the lies behind their words The other recalling the Follies performances of decades earlier allows Sondheim to evoke the words and music of Irving Berlin Cole Porter and many other popular songwriters from the interwar period The show culminates in a series of fantasy production numbers that unite past and present displaying each of the four principals in his or her own folly using materials evocative of the past to suggest the pain behind popular entertainment and the dangers of nostalgia Publishing the music in full score a rarity for musicals allows a full appreciation of both its detail and Jonathan Tunick s orchestrations This edition is published by permission of Round Hill Carlin previously Carlin America Inc **African Christian Theology, Volume 1, Number 2, September 2024** Joshua Robert Barron, 2024-12-20 African Christian Theology is the academic journal of the Association for Christian Theological Education in Africa ACTEA The mission of ACTEA is to strengthen theological education through accreditation scholarship and support services to serve the church and transform society The journal is one way in which ACTEA engages theological educators and church leaders in addressing relevant issues facing the church and society in Africa African Christian Theology serves the whole of Africa and provides a venue for conversations between different regions of Africa as well as an organ through which African voices can address World Christianity at large Following in the footsteps of Kwame Bediako Byang Kato K Mana Lamin Sanneh Andrew F Walls and Isaac Zokou the journal promotes World
