On Searle:

On Searle William Hirstein, 2001 This brief text assists students in understanding Searle's philosophy and thinking so they can more fully engage in useful intelligent class dialogue and improve their understanding of course content Part of the Wadsworth Notes Series which will eventually consist of approximately 100 titles each focusing on a single thinker from ancient times to the present ON SEARLE is written by a philosopher deeply versed in the philosophy of this key thinker Like other books in the series this concise book offers sufficient insight into the thinking of a notable philosopher better enabling students to engage in reading and to discuss the material in class and on paper **(On) Searle on Conversation** John R. Searle, Herman Parret, Jef Verschueren, 1992-02-20 At an international conference held in 1981 at the Universidade Estadual of Campinas Brazil a controversial lecture was given by John Searle which presented two conceptual theses that conversation does not have an intrinsic structure about which a relevant theory can be formulated and that conversations are not subject to constitutive rules This lecture was first published in 1986 under the title Notes on Conversation and was revised several times afterwards The present volume offers the most recent version Because of the importance of the article for conversation analysis and for pragmatics in general the editors have put together Searle's target article along with eight original comments The volume closes with a reply to replies by Searle In sociolinguistic studies intralingual code switching has been given less attention than most other areas and linguists attitudes towards the use of non standard varieties still often suffer from fallacies of prescriptivism Czech a clear case of a language having a Standard and a strong central vernacular with intensive shifting between them offers many points of general interest to sociolinguists **Searle's Philosophy and Chinese Philosophy** Bo Mou, 2008-06-30 This volume investigates how through critical engagement the philosophy of John Searle in the Western analytic tradition and some thoughts and strands in Chinese philosophy can jointly contribute to the common philosophical enterprise and shows how such comparative methodology of constructive engagement is important or even indispensable in philosophical inquiry The anthology includes Searle's keynote essay and 15 engaging pairs of essay reply dialogues each of which consists of one previously unpublished essay by some expert's and Searle's engaging reply and which are organized into four subjects respectively on mind language morality and meta philosophical methodological issues The anthology also includes the volume editor's theme introduction on the constructive engagement movement in view of Searle's philosophy and Chinese philosophy Contributors include Robert E Allinson Chung ying Cheng Kim chong Chong Chris Fraser Yiu ming Fung Soraj Hongladarom Joel W Krueger B Jeannie Lum Aloysius P Martinich Bo Mou Anh Tuan Nuyen John R Searle Avrum Stroll Marshall D Willman Kai yee Wong and Yujian Zheng The Philosophy of Science: N-Z, Index Sahotra Sarkar, Jessica Pfeifer, 2006 The first in depth reference to the field that combines scientific knowledge with philosophical inquiry this encyclopedia brings together a team of leading scholars to provide nearly 150 entries on the essential concepts in the philosophy of science The areas covered include biology chemistry epistemology and metaphysics

physics psychology and mind the social sciences and key figures in the combined studies of science and philosophy Midwest

A Critique of the Ontology of Intellectual Property Law Alexander Peukert, 2021-05-20 Intellectual property IP law operates with the ontological assumption that immaterial goods such as works inventions and designs exist and that these abstract types can be owned like a piece of land Alexander Peukert provides a comprehensive critique of this paradigm showing that the abstract IP object is a speech based construct which first crystalised in the eighteenth century He highlights the theoretical flaws of metaphysical object ontology and introduces John Searle's social ontology as a more plausible approach to the subject matter of IP On this basis he proposes an IP theory under which IP rights provide their holders with an exclusive privilege to use reproducible Master Artefacts Such a legal realist IP theory Peukert argues is both descriptively and prescriptively superior to the prevailing paradigm of the abstract IP object This work was originally published in German and was translated by Gill Mertens

Moore's Paradox Ulla Schmid, 2014-10-29 Representationalism grasps the meaning and grammar of linguistic expressions in terms of reference that is as determined by the respective objects concepts or states of affairs they are supposed to represent and by the internal structure of the content they articulate As a consequence the semantic and grammatical properties of linguistic expressions allegedly reflect the constitution of the objects they refer to Questions concerning the meaning of particular linguistic expressions are supposed to be answerable by investigating the metaphysics of the corresponding phenomena Accordingly questions of the meaning of psychological concepts are turned into questions of the nature of psychological states Concerned with Moore's Paradox representationalist approaches lead into an investigation of the state of affairs supposedly described by Moore paradoxical assertions and thus eventually into investigations concerning the metaphysics of belief This book argues that this strategy necessarily yields both a wrong solution to Moore's Paradox and an inadequate conception of the meaning of the expression I believe Turning to the metaphysics of belief is of no use when it comes to understanding either the meaning of the expression I believe or the logic of avowals of belief Instead it proposes to focus on the role they play in language the ways in which they are used in practice

Foundations of Speech Act Theory S.L. Tsohatzidis, 2002-09-11 Foundations of Speech Act Theory investigates the importance of speech act theory to the problem of meaning in linguistics and philosophy The papers in this volume written by respected philosophers and linguists significantly advance standards of debate in this area Beginning with a detailed introduction to the individual contributors this collection demonstrates the relevance of speech acts to semantic theory It includes essays unified by the assumption that current pragmatic theories are not well equipped to analyse speech acts satisfactorily and concludes with five studies which assess the relevance of speech act theory to the understanding of philosophical problems outside the area of philosophy of language

Evoking Story for Transformation Lyn Nixon, 2025-08-21 Lyn Nixon takes a fresh approach to the question of whether New Testament authors quote the Old Testament without regard to the original Old Testament meaning that is out of context Her action model uses Speech Act

Theory to examine the way authors and readers together contribute to the communication of meaning In her model for meaning to be successfully communicated the reader must experience the transformation intended by the author Lyn Nixon applies her theoretical model to two examples of New Testament quotation where previous scholars have claimed the author quotes the Old Testament in a way that does not correspond to the original meaning Her case studies the use of Ps 115 1 LXX in 2 Cor 4 13 and of Ps 110 1 MT by various New Testament speakers and authors provide new insights into ways that the Old Testament meaning including its transformative intention resonates in the quoting of New Testament texts **Using**

Words and Things Mark Coeckelbergh, 2017-06-26 This book offers a systematic framework for thinking about the relationship between language and technology and an argument for interweaving thinking about technology with thinking about language The main claim of philosophy of technology that technologies are not mere tools and artefacts not mere things but crucially and significantly shape what we perceive do and are is re thought in a way that accounts for the role of language in human technological experiences and practices Engaging with work by Wittgenstein Heidegger McLuhan Searle Ihde Latour Ricoeur and many others the author critically responds to and constructs a synthesis of three extreme idealtype untenable positions 1 only humans speak and neither language nor technologies speak 2 only language speaks and neither humans nor technologies speak and 3 only technology speaks and neither humans nor language speak The construction of this synthesis goes hand in hand with a narrative about subjects and objects that become entangled and constitute one another Using Words and Things thus draws in central discussions from other subdisciplines in philosophy such as philosophy of language epistemology and metaphysics to offer an original theory of the relationship between language and philosophy of technology centered on use performance and narrative and taking a transcendental turn **Dialogue** Edda

Weigand, 2010 The Mixed Game Model represents a holistic theory of dialogue which starts from human beings competence in performance and describes how language is integrated in a general theory of human action and behaviour Human beings are able to adapt to changing conditions and to pursue their interests by the integrated use of various communicative means mainly verbal perceptual and cognitive The core unit is the dialogic action game or the mixed game with human beings at the centre acting and reacting in cultural surroundings The key to opening up the complex whole is human beings nature The Mixed Game Model demonstrates how the different disciplines of the natural and social sciences and the humanities are mutually interconnected After a detailed overview of the state of the art the fundamentals of the theory are laid down They include a typology of action games which ranges from minimal games to complex institutional games The description is illustrated by analyses of authentic games **Encyclopedia of Philosophy and the Social Sciences** Byron

Kaldis, 2013-04-02 The entries in this encyclopedia give readers an opportunity to explore interconnections clarify commonalities as well as differences or comparative contrasts discover new fields or ideas of intellectual interest explore adjacent conceptual zones that may be found to further expand their own disciplinary domains and also understand better

their own academic areas of expertise and the historical provenance of each p xxxi *Philosophy of Social Science* Mark Risjord, 2022-07-25 *Philosophy of Social Science* A Contemporary Introduction examines perennial questions of philosophy through engaging the empirical study of society Questions of normativity concern the place of values in social scientific inquiry Questions of naturalism concern the relationship between the natural and the social sciences And questions of reductionism ask how social institutions relate to the people who constitute them This accessible text offers a comprehensive overview of debates in the field with special attention to new research programs Topics include the relationship of social policy to social science interpretive research cognitive and evolutionary explanations intentional action explanation rational choice theory conventions and social norms joint intentionality causal inference and experimentation Detailed examples of social scientific research motivate the philosophical questions and illustrate the important concepts Treating philosophical commitments as implicit in social science students of the social sciences will benefit from its application of philosophical argument to methodological and theoretical problems The text argues that social science transforms philosophical questions and students of philosophy will benefit from its direct engagement with contemporary debates The Second Edition provides updates with the most recent literature and adds two new chapters one on modeling and one on the role of race and gender in the social sciences Key Updates to the Second Edition A new chapter on Modeling and Explaining which explores how models represent social systems and whether highly idealized models explain A new chapter on Race and Other Social Constructions capturing much of the recent empirical research and philosophical interest in the social construction of categories like race and gender Revised and updated chapters throughout clarifying earlier presentations and bringing discussions from the First Edition into line with new research Updated annotated Further Reading lists which now include relevant publications from 2013 to 2022 **Dramatic Discourse** Vimala Herman, 2005-06-20 This wide ranging and comprehensive study uses the major frameworks of modern discourse studies to analyse dramatic dialogue **Philosophy of Technology and Engineering Sciences** , 2009-11-27 The Handbook *Philosophy of Technology and Engineering Sciences* addresses numerous issues in the emerging field of the philosophy of those sciences that are involved in the technological process of designing developing and making of new technical artifacts and systems These issues include the nature of design of technological knowledge and of technical artifacts as well as the toolbox of engineers Most of these have thus far not been analyzed in general philosophy of science which has traditionally but inadequately regarded technology as mere applied science and focused on physics biology mathematics and the social sciences First comprehensive philosophical handbook on technology and the engineering sciences Unparalleled in scope including explorative articles In depth discussion of technical artifacts and their ontology Provides extensive analysis of the nature of engineering design Focuses in detail on the role of models in technology *The Performative Nature and Function of Isaiah 40-55* Jim W. Adams, 2006-10-01 This dissertation presents the basic philosophical concepts of speech act theory in order to accurately implement them alongside other

interpretive tools **Postcolonial Hauntologies** Ayo A. Coly, 2019-06-01 Postcolonial Hauntologies is an interdisciplinary and comparative analysis of critical literary visual and performance texts by women from different parts of Africa While contemporary critical thought and feminist theory have largely integrated the sexual female body into their disciplines colonial representations of African women s sexuality haunt contemporary postcolonial African scholarship which by maintaining a culture of avoidance about women s sexuality generates a discursive conscription that ultimately holds the female body hostage Ayo A Coly employs the concept of hauntology and ghostly matters to formulate an explicative framework in which to examine postcolonial silences surrounding the African female body as well as a theoretical framework for discerning the elusive and cautious presences of female sexuality in the texts of African women In illuminating the pervasive silence about the sexual female body in postcolonial African scholarship Postcolonial Hauntologies challenges hostile responses to critical and artistic voices that suggest the African female body represents sacred ideological discursive ground on which one treads carefully if at all Coly demonstrates how ghosts from the colonial past are countered by discursive engagements with explicit representations of women s sexuality and bodies that emphasize African women s power and autonomy **Mind, Language and Subjectivity** Nicholas Georgalis, 2014-11-20 In this monograph Nicholas Georgalis further develops his important work on minimal content recasting and providing novel solutions to several of the fundamental problems faced by philosophers of language His theory defends and explicates the importance of thought tokens and minimal content and their many to one relation to linguistic meaning challenging both externalist accounts of thought and the solutions to philosophical problems of language they inspire The concepts of idiolect use and statement made are critically discussed and a classification of kinds of utterances is developed to facilitate the latter This is an important text for those interested in current theories and debates on philosophy of mind philosophy of language and their points of intersection **Im/Politeness Implicatures** Michael Haugh, 2014-12-11 This volume brings together two highly researched but also highly controversial concepts those of politeness and implicature A theory of implicature as social action and im politeness as social practice is developed that opens up new ways of examining the relationship between them It constitutes a fresh look at the issues involved that redresses the current imbalance between social and pragmatic accounts of im politeness **Socializing Metaphysics** Frederick F. Schmitt, 2003 Social metaphysics provides a foundation for social theory as well as for social epistemology philosophy of language philosophy of mind action theory ethics and political philosophy *Naming and Referring* David S. Schwarz, 1979 No detailed description available for Naming and Referring
