Review of Current Military Literature ,1953-04 Worldwide Government Directory with Intergovernmental Organizations 2013 CQ Press,2013-05-10 Published for more than 24 years there is no substitute for the Worldwide Government Directory which allows users to identify and reach 32 000 elected and appointed officials in 201 countries plus the European Union Extensive coverage that includes over 1 800 pages of executive legislative and political branches heads of state ministers deputies secretaries and spokespersons as well as state agencies diplomats and senior level defense officials It also covers the leadership of more than 100 international organizations World Government contact information that includes phone numbers and email Listings include Name addresses telephone and fax numbers email and web addresses Titles Hierarchical arrangements defining state structures **Great Commanders [Illustrated Edition]** Dr. Christopher Gabel,2014-08-15 Includes 3 maps and 7 illustrations The command of military forces in combat is unlike any other field of human endeavor If war is the ultimate form of human competition then the commander is the ultimate competitor The commander operates in an environment of chance uncertainty and chaos in which the stakes are quite literally life and death He or she contends against an adversary who is using every means fair or foul to foil his plans and bring about his defeat The commander is ultimately responsible for every variable that factors into military success or failure training logistics morale equipment planning and execution The commander reaps the lion s share of plaudits in victory but also must accept the blame in defeat warranted or not Very often the line that separates fame and ignominy is slender indeed It is not difficult to identify great commanders though the overwhelming majority of generals who win battles are never considered great Something more than a favorable ratio of wins to losses is needed to establish greatness The truly great commander is generally considered to be one who attains the unexpected or the unprecedented one who stands above his contemporaries through his skill on the battlefield or through the sheer magnitude of his accomplishments The commanders selected were masters of warfare in their particular time and environment Each capitalized upon the social political economic and technological conditions of his day to forge successful military forces and win significant and noteworthy victories that profoundly altered the world in which he lived Dr Christopher R Gabel The Great Commanders covered by this volume are Alexander the Great Genghis Khan Napoleon John J Pershing Erwin Rommel and Curtis E LeMay *Battalion Commanders at War* Steven Thomas Barry,2013-05-23 Most histories of the U S Army in World War II view the Mediterranean Theater of Operations primarily as a deadly training ground for very green forces where lessons learned on the beaches of Oran in the hills of the Kasserine Pass area and at the collapse of the Tunis bridgehead all contributed to later success in Western Europe Steven Barry however contends that victory in the MTO would not have materialized without the leadership of battalion level

commanders They operated at a high level despite the lack of combat experience for themselves and their troops ineffective leadership at higher levels and deficiencies in equipment organization and mobilization Barry portrays these officers as highly trained adaptable and courageous in their first combat experiences in North Africa and Sicily Their leadership he argues brought discipline maturity experience and the ability to translate common operational guidance into tactical reality and thus contributed significantly to battlefield success in North Africa and Sicily in 1942 1943 To explain how this happened he examines their prewar experiences including professional military education and unit training exercises personal factors such as calmness and physical resilience under fire and the ability to draw upon doctrine creatively apply the resources at their disposal and clearly define and communicate mission goals and means He also reveals how battalion leaders incorporated technological innovations into combined arms maneuvers by employing tank capabilities and close air support doctrine As Barry s assessment shows these battalion commanders were not the sole reason for the Allied triumph in North Africa and Sicily but victory would not have been possible without the special brand of military leadership they exhibited throughout those campaigns Under their leadership even inexperienced units were able to deliver credible combat performance and without the regular army battalion leaders U S units could not have functioned tactically early in the war One of the few studies to focus on tactical adaptation at the battalion level in conventional warfare Barry s book attests to the pivotal value of professional military education and makes an important contribution to today s organizational learning debate while providing an in depth view of adaptation of U S infantry and armored forces in 1942 1943
