Nuclear Weapons Modernization in Russia and China United States. Congress. House. Committee on Armed Services. Strategic Forces Subcommittee, 2012

The Russia-China Axis Douglas E. Schoen, Melik Kaylan, 2014-09-09 The United States is a nation in crisis. While Washington's ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare, we face an array of foreign policy crises for which we seem increasingly unprepared. Among these, none is more formidable than the unprecedented partnership developing between Russia and China, suspicious neighbors for centuries and fellow Communist antagonists during the Cold War. The two longtime foes have drawn increasingly close together because of a confluence of geostrategic, political, and economic interests, all of which have a common theme of diminishing, subverting, or displacing American power. While America's influence around the world recedes in its military and diplomatic power, in its political leverage, in its economic might, and perhaps most dangerously, in the power and appeal of its ideas, Russia and China have seen their influence increase. From their support for rogue regimes such as those in Iran, North Korea, and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft, Moscow and Beijing are playing the game for keeps. Meanwhile, America, pledged to leading from behind, no longer does much leading at all. In *The Russia-China Axis*, Douglas E. Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian-Chinese Axis, and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance, which may soon threaten the peace and security of the world.

Minimum Deterrence: Examining the Evidence Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy's new book *Minimum Deterrence: Examining the Evidence* is the first of its kind. Dr. Keith Payne, former Secretary of Defense, James Schlesinger, and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence. In general, Minimum Deterrence does not fare well under the careful scrutiny. Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future. Because nuclear weapons are so destructive, their thinking goes, no foreign leader would dare challenge US capabilities. The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China, reinforcement of the arms control and Nonproliferation Treaty, billions of defense dollars in savings, and greater international stability on the way to nuclear zero. As political pressure builds to pursue this vision of minimum US deterrence,
