Russian Statecraft The Politika Of Iurii Krizhanich:

Russian Statecraft, 1985 *God, Tsar, and People* Daniel B. Rowland, 2020-11-15 *God Tsar and People* brings together in one volume essays written over a period of fifty years using a wide variety of evidence texts icons architecture and ritual to reveal how early modern Russians 1450 1700 imagined their rapidly changing political world This volume presents a more nuanced picture of Russian political thought during the two centuries before Peter the Great came to power than is typically available The state was expanding at a dizzying rate and atop Russia's traditional political structure sat a ruler who supposedly reflected God's will The problem facing Russians was that actual rulers seldom or never exhibited the required perfection Daniel Rowland argues that this contradictory set of ideas was far less autocratic in both theory and practice than modern stereotypes would have us believe In comparing and contrasting Russian history with that of Western European states Rowland is also questioning the notion that Russia has always been and always viewed itself as an authoritarian country *God Tsar and People* explores how the Russian state in this period kept its vast lands and diverse subjects united in a common view of a Christian polity defending its long frontier against powerful enemies from the East and from the West

Russian Corporate Capitalism from Peter the Great to Perestroika Thomas C. Owen, 1995 Professor Owen examines corporate capitalism under the Tsarist and late Soviet regimes Covering two hundred years from the Tsarist period through perestroika and into the present he demonstrates the historical obstacles that have confronted Russian corporate entrepreneurs and the continuity of Russian attitudes toward corporate capitalism *The Cambridge History of Russia: Volume 1, From Early Rus' to 1689* Maureen Perrie, Ronald Grigor Suny, 2006 An authoritative history of Russia from early Rus to the reign of Peter the Great **The Modernisation of Russia, 1676-1825** Simon Dixon, 1999-07-29 This is the first book to place Russia's long eighteenth century squarely in its European context The conceptual framework is set out in an opening critique of modernisation which while rejecting its linear implications maintains its focus on the relationship between government economy and society Following a chronological introduction a series of thematic chapters covering topics such as finance and taxation society government and politics culture ideology and economy emphasise the ways in which Russia's international ambitions as an emerging great power provoked administrative and fiscal reforms with wide ranging and often unanticipated social consequences This thematic analysis allows Simon Dixon to demonstrate that the more the tsars tried to modernise their state the more backward their empire became A chronology and critical bibliography are also provided to allow students to discover more about this colourful period of Russian history **The Making of Russian Absolutism 1613-1801** Paul Dukes, 2014-01-14 Revised and expanded the second edition of this fascinating study surveys the first two centuries of Romanov rule from the foundation of the dynasty by Michael Romanov in 1613 to the accession of Alexander I in 1801 The central theme of the book is the growth of absolutism in Russia throughout these years and it traces in detail how the Russian variety of what was a contemporary European phenomenon came fully into being

Russia in the Early Modern World Donald Ostrowski, 2022-01-25 A fundamental problem in studying early modern Russian history is determining Russia's historical development in relationship to the rest of the world The focus throughout this book is on the continuity of Russian policies during the early modern period 1450 1800 and that those policies coincided with those of other successful contemporary Eurasian polities The continuities occurred in the midst of constant change but neither one nor the other continuities or changes alone can account for Russia's success Instead Russian rulers from Ivan III to Catherine II with their hub advisors managed to sustain a balance between the two During the early modern period these Russian rulers invited into the country foreign experts to facilitate the transfer of technology and know how mostly from Europe but also from Asia In this respect they were willing to look abroad for solutions to domestic problems Russia looked westward for military weaponry and techniques at the same time it was expanding eastward into the Eurasian heartland The ruling elite and by extension the entire ruling class worked in cooperation with the ruler to implement policies The Church played an active role in supporting the government and in seeking to eliminate opposition to the government
