Redefining the Political Novel Sharon M. Harris, 1995 While critical studies of the American political novel date from the 1920s such considerations of the genre have failed whether wittingly or unwittingly to recognize works by women The exclusion is usually based on a distinction between social novels and political novels and the result is an understanding of the political as a largely male province In this thought provoking collection of essays the contributors seek not simply to add works by

women to the canon of political novels but rather to demand a conceptual revolution one that questions the very precepts on which the canon is based This redefinition of the political novel takes many factors into account including gender race and class and their relation to our most basic conceptions of literary and aesthetic value
