Mammoths Charles River Editors, 2020-02-13 Includes pictures Includes a bibliography for further reading It is difficult to ignore the effortless cool of a saber toothed tiger The fanged feline was equipped with the savage strength of a lion the lethal stealth of a puma the intimidating gait of a black bear and the strapping muscular arms of a gorilla Amazingly however those traits did not stand out as much as the long dagger like fangs that earned the Smilodon its famous nickname The saber toothed tiger legend has it was as ferocious as it was fearless often tackling beasts twice their size Saber toothed tigers were arguably the most fabled of all the Ice Age creatures The fearsome beast has earned itself quite the reputation and it has been referenced to appeared in and inspired unique characters in endless books films comics and other pop culture mediums For example Marvel s Victor Creed otherwise known as Sabretooth is most known as Wolverine s nemesis and he s depicted as a hulking vigorously robust menace in a red and orange gold jumpsuit with a hunched back a shock of wild blond hair tiger like claws and frightening fangs As that indicates the prehistoric creature is often portrayed as impossibly cunning unfeeling villains Even in films geared towards children such as the first of the Ice Age animations the saber toothed tigers excluding Diego are depicted as vicious and vindictive lawless fiends whose sights are set on a Neanderthal toddler The name and reputation of the ruthless saber toothed tiger as enduring as it is chilling overshadows those of its contemporaries and the fanged feline remains a household name and one of the foremost symbols of the Ice Age to this very day It was a frosty wintry September morning in 2012 when 11 year old Yevgeny Zhenya Salinder donned his warmest quilted jacket a knitted woolen cap and matching mittens and headed out the door with his faithful tail wagging dogs in tow Like most mornings the kid ambled about near the Sopkarga polar weather station an isolated region in the northern Russian Taymyr Peninsula where he resided but this particular morning his pace was slowed by a foul almost eye watering stench Intrigued Salinder and the dogs sniffed out the source of the strange miasma and in the process they stumbled upon a defrosted pair of heels from an unknown creature protruding from the cold earth When young Salinder relayed what he had found to his parents they alerted the authorities but initially nobody had the slightest notion how profound the discovery was The heels as it turned out were attached to the carcass of a 16 year old woolly mammoth that perished some 30 000 years ago almost completely intact The mammoth initially nicknamed Zhenya after its discoverer was said to be the most significant discovery of a mammoth since 1901 Since Georges Cuvier recognized the specimens as an extinct elephant species near the end of the 18th century various finds of mammoth fossils particularly in places where they were well preserved in the cold have made the woolly mammoth perhaps the most popular extinct animal outside of the dinosaurs Standing around 10 feet tall and weighing several tons woolly mammoths seem like the stuff of legend but ancient cave art indicated that unlike dinosaurs woolly mammoths were contemporaries of early humans with the last ones going extinct only about 4 000 years ago All of that explains why people have long been fascinated by woolly mammoths and have even envisioned bringing them back to life
