like Vishnu's fish, tortoise and boar forms and as vahanas the swan, bull, lion and tiger were all vehicles of major deities and are thus sacred by association. Some animals like the snake are worshipped out of fear. Birds such as the crow are associated with the abode of the dead or the souls of ancestors while the cow's sanctity may derive from its economic value. There are also hero animals such as the vanaras and animals which were totemic symbols of tribes that were assimilated into Vedic Hinduism. **Sacred Animals of India** draws on the ancient religious traditions of India, Hinduism, Buddhism and Jainism to explore the customs and practices that engendered the veneration of animals in India. This book also examines the traditions that gave animals in India protection and is a reminder of the role of animal species in the earth's biodiversity.

Sacred and Mythological Animals Yowann Byghan, 2020-03-25 From the household cat to horses that can fly, a surprisingly wide range of animals feature in religions and mythologies all across the world. The same animal can take on different roles: the raven can be a symbol of evil, a harbinger of death, a wise messenger or a shape-changing trickster. In Norse mythology, Odin's magical ravens perch on his shoulders and bring him news. This compendium draws upon religious texts and myths to explore the ways sacred traditions use animal images, themes and associations in rituals, ceremonies, texts, myths, literature and folklore across the world. Sections are organized by the main animal classifications such as mammals, birds, reptiles, fish, amphibians and insects. Each chapter covers one significant grouping such as dogs, cats or horses, first describing an animal scientifically and then detailing the mythological attributes. Numerous examples cite texts or myths. A final section covers animal hybrids, animal monsters and mythical animals as well as stars, constellations and Zodiac symbols. An appendix describes basic details of the religions and mythologies covered. A glossary defines uncommon religious terms and explains scientific animal names.

How practitioners of Hinduism feel about animals Janine Bergmeir, 2019-02-05 Seminar paper from the year 2018 in the subject Theology Hinduism grade 1 5 University of Tübingen Anglistik course It s just Emotions On the role of Affects and Emotions language English abstract The importance of animals in human lives differs greatly from one person to another especially from one culture to the other Animals of all kinds have always been omnipresent for mankind for the purposes of domestication as workers as companions as tools or as resources in the form of food for consuming They appear in ancient cave paintings and nowadays on commercial farms As long as humanity existed animals have always played an important role and society could not have advanced to the point it has today Nevertheless there are different perceptions of animals and how they are treated A popular instance is the case of dogs In some cultures like the United States or the United Kingdom they are loved and considered a great pet to have with the family and at home In other cultures such as those where Islam is the majority religion dogs may be perceived as dirty or dangerous In China milk fed puppies are considered a delicacy So why do human beings assign different levels of importance to animals In Hinduism every single living being possesses a soul from the animals down to the insects and tiny organisms In their belief system like human beings animals are also beings and subject to the cycle of birth and death and the laws of nature

Hinduism is a compassionate religion and treats all living beings with great respect. This could be one explanation why animals occupy an important place in Hinduism. According to that, Hindus have special feelings about animals and treat them in another way than people of other religions and cultures do. A widespread view of Jains, Buddhists and Hindus is that animals should not be used by humans as food or for other purposes. Differing attitudes and beliefs regarding the relationship of humankind to other creatures lies in the inner motivation of how to see and treat them and is expressed in forms of emotions and feelings towards the animals. Therefore the human-animal relationship in a Hinduist way of life depends on their belief system and hence emotions and feelings are coherent with that. Accordingly, faith determines how these people who belong to the oldest religion in the world feel about animals.

Spirit Animals and the Wheel of Life Hal Zina Bennett, 2001-02-01

Though our ancient ancestors had a deep spiritual connection to the natural world, most modern humans have lost that connection, resulting in ever-increasing ecological assaults on our planet. As environmental quality continues to worsen, we must find a way to spiritually reconnect with Mother Earth before it is too late. Ecospiritualism is a form of spirituality that embraces and takes responsibility for the natural world we live in. One of the most practical, enjoyable and simple ways of reclaiming our ecospiritual connection with Mother Earth is journeying with the spirits of animals, just as our ancestors did thousands of years ago. Animals most intimately connected with Mother Earth are the perfect guides to the ancient wisdom we have lost. Mole, eagle, badger, wolf, bear, mountain lion: each animal has its place on the sacred medicine wheel; each has knowledge vital to the future of our Earth and to rediscovering our rightful place in it. In *Spirit Animals*, author Hal Zina Bennett offers an accessible form of spiritual orienteering in which personal power, animals are the guides and teachers, and shamanism is the means by which we work with and learn from them.
