*Sacrifice: Its Nature and Function* Henri Hubert, 2013 Religion and Cultural Studies Susan L. Mizruchi, 2001-04 Americans have never been more religious than they are now at the dawn of the twenty first century By all reports attendance rates at traditional places of worship are high and rising the influx of new immigrant religions has revitalized standard faiths and drawn in those who had strayed from them Popular television shows like The Simpsons feature characters who go to church every Sunday and speak to God special events like the 1998 outdoor mass in Worcester Massachusetts for a comatose girl believed to have miraculous powers attract thousands of people This collection is both part of this ferment and an intellectual reflection upon it Religion and Cultural Studies features essays by major scholars from the fields of anthropology history literary criticism and religion in order to enrich critical discourse about religion and culture Despite the variety of disciplines represented by this group of scholars and the variety of cultures explored in their essays from fifteenth century Flemish asceticism and nineteenth century African American spiritualism to Russian blood libel trials and Alien Abduction Reports in the twentieth century their common ground is the question of religion's place in current American academic analysis and more broadly in American life today The volume's range of vocabulary and subject matter is aimed at vitalizing scholarly interest in the field of religion and cultural studies and deepening intellectual inquiry in the contemporary academy The contributors are Eytan Bercovitch Karen McCarthy Brown Gillian Feeley Harnik Richard Wightman Fox Jenny Franchot Giles Gunn Geoffrey Galt Harpham Bruce B Lawrence Jack Miles Susan L Mizruchi and Jonathan Z Smith *Expanding the Economic Concept of Exchange* Caroline Gerschlager, 2012-12-06 Exchange is a pervasive concept in everyday life affecting phenomena as diverse as interpersonal relationships and market transactions In addition economists have used the concept in a highly specific and clearly delineated way Against this background Expanding the Economic Concept of Exchange sets out to expand the concept of exchange by crossing the boundaries laid down by economists and by examining the function played by deceptions self deceptions and illusions The main motivation for expanding the concept of exchange was the realization that in the prototypical economic model deception is not taken into account Hence economists traditionally regard deception as some sort of irrationality as a flaw in an otherwise perfectly

rational process Authors represented in this volume take a different approach examining deception as a constituent quality of exchange This is shown by the contributions drawing on recent developments in economic theory by those with an anthropological orientation as well as by a contribution referring specifically to Adam Smith An interrogation into deception is long overdue in economics This volume prepares the ground for and makes the first contributions to explicitly acknowledging deceptions self deceptions and illusions as fundamental dimensions allowing us as economists to further research and develop the concept of change A particular and perhaps unexpected focus of this volume lies on anthropology because economics can clearly benefit from integrating selected results on deception from outside its expanding domain It is primarily targeted at economists interested in institutional aspects of exchanges and social theory In addition the topic will find interested readers from anthropology cultural studies science studies philosophy Theology and the First Theory of Sacrifice Ivan Strenski,2003-01-01 Strenski argues that public discourse about religious notions like sacrifice cannot be theological in our modern societies Theological notions of sacrifice and theological approaches to it should be replaced by those like that developed by the Durkheimians because theological discourse cannot but help being religiously biased
