Sg The Lifespan:

Longevity in Singapore Dr Helen Ko, 2022-11-15 By 2030 one in four Singaporeans will be aged 65 or older. The ageing population will affect all levels and arenas of Singapore society: individuals, families, and even organisations. The financial implications of this demographic transition have been a key concern for the government. Against the above backdrop, this book seeks to achieve the following: Firstly, to provide readers with a better understanding of the physical and psychological changes and illnesses as they age. Secondly, it looks at the infrastructure and tools to enable seniors to age in place, as well as the necessary support and training for family and caregivers. The third aim highlights how and why we need to integrate older workers fully into the workplace, as well as the changes needed to attain this goal. Finally, this book emphasises that ageing should not be seen in a negative light and that there are vast opportunities and dividends that could result from longevity in the 21st century. Ultimately, the goal of this book is to facilitate older adults to age gracefully in Singapore, living out their golden years with dignity in the community and be given the opportunities to continue to contribute meaningfully to society and live purposeful lives.

Mechanisms of Life History Evolution Thomas Flatt, Andreas Heyland, 2011-05-12 This interdisciplinary volume unites evolutionary and molecular biologists from various fields: life history theory, molecular biology, developmental biology, aging, phenotypic plasticity, social behaviour, and endocrinology. Who use studies of molecular mechanisms to solve fundamental questions in life history evolution in a variety of organisms.

Cost-benefit Analysis and Health Care Evaluations Robert J. Brent, 2004-01-01 Professor Brent's book is a superb and much needed text in the field of health care evaluation. The economic approaches for appraisal of health care programs are presented with greater clarity than any other available text. A comprehensive review of cost minimization, cost effectiveness analysis, cost utility analysis, and cost benefit analysis is given in a simple and yet very insightful manner that pointedly demonstrates their fundamental principles, methodological requirements, and common linkages for evaluation research. The book skilfully merges theory and application of the economic analyses of health care, combining the latest literature with adroit illustrations of required methodologies and easily understandable examples that inform the reader of how empirical evaluation research should be conducted. Major evaluation concerns about the appropriateness of discounting health benefits, the appropriate discount interest rate, and intangible benefits and costs are critically appraised. Not only is the criterion of economic efficiency of health care programs explored directly and with lucidity, but the important social question of the equity of health interventions is also assessed straightforwardly. Students of health care, as well as health policy analysts and administrators, are provided with a considerable solid foundation for undertaking evaluation of complex health care issues. In short, Professor Brent has even made the economics of health care evaluation accessible to non-economists in the health care field. Paul L. Solano, University of Delaware, US. Cost-benefit analysis is the only method of economic evaluation which can effectively indicate whether a health care treatment or intervention is worthwhile. This book attempts to build a bridge between cost

benefit analysis as developed by economists and the health care evaluation literature which relies on other evaluation approaches such as cost minimization cost effectiveness analysis and cost utility analysis Robert Brent explains the many different ways in which these other valuation techniques can be converted into cost benefit analysis and examines both the traditional human capital and modern willingness to pay approaches Case studies are used throughout to explain and illustrate the various methodologies being examined The author follows an applied economics approach in which methods and ideas are evaluated according to practicability and not according to their theoretical purity Ultimately he resolves a number of disputes and makes some new but subtle contributions by reinterpreting correcting and extending existing work The book covers the topic in an accessible manner from the foundations to the frontiers of the field and clearly explains all the necessary economic principles along the way Cost Benefit Analysis and Health Care Evaluations will be invaluable to students and researchers of economics public policy and health care policy as well as policymakers and health care practitioners It can also be used as a comprehensive introductory text by anyone with an interest in cost benefit analysis

Gender, Lifespan and Quality of Life Elizabeth Eckermann, 2013-12-11 This publication addresses the gender dimensions of people's lived experience and emphasizes how gender relationships differentially impact on women's and girls as well as men's and boys' subjective well-being across the lifespan It therefore fills a significant gap in the literature on quality of life and subjective well-being The book brings together research which compares female's and male's subjective experiences of well-being at various life stages from a variety of countries and regions particularly focusing on women's subjective well-being Sex disaggregation of data on objective conditions of quality of life is now routinely undertaken in many countries of the world However despite the burgeoning of objective data on sex differences in life conditions across the world very little gender analysis is carried out to explain fully such difference and there is still a serious dearth of data on gender differences in subjective experiences of quality of life and well-being This publication will assist researchers teachers service providers and policy makers in filling some of the gaps in currently available literature on the nexus between age and gender in producing differential experiences of subjective wellbeing Life-Span Research on the Prediction of Psychopathology L. Erlenmeyer-Kimling, Nancy E. Miller, 2021-09-30 Originally published in 1986 the impetus for this volume developed from a conference organized by Barbara Snell Dohrenwend and the editors on behalf of the Society for Life History Research in Psychopathology the Society of the Study of Social Biology and the Center for Studies of Mental Health of Aging at the National Institute of Mental Health The theme of the conference was life span research on the prediction of psychopathology and the goal was to bring together outstanding researchers who were engaged in longitudinal investigations at the time and whose work collectively covered the entire life span from infancy to old age The papers that were presented at the conference were updated so that the chapters that follow represented current state of the art considerations in some of the best ongoing studies concerned with the prediction of psychopathology at that time Autism Spectrum Disorders Through

Reading Across the Life Span Steven R. Yussen, M Cecil Smith, 2012-12-06 One of the liveliest areas of research in the social sciences is reading Scholarly activity is currently proceeding along a number of different disciplinary lines addressing a multitude of questions and issues about reading A short list of disciplines involved in

the study of reading would include linguistics psychology education history and gerontology Among the important questions being addressed are some long standing concerns How are reading skills acquired What are the basic components of reading skill How do skilled readers differ from less skilled ones What are the best ways to approach instruction for different groups of readers young beginning readers poor readers with learning problems and teenage and adult illiterates How can reading skill best be measured what standardized instruments and observational techniques are most useful The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field The purpose of this volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span Reading is clearly an activity that spans each of our lives Yet most accounts of it focus on some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading The book is divided into four parts

Healthy Ageing in Singapore Sabrina Ching Yuen Luk, 2023-03-31 Singapore is the world's second fastest ageing society and will become a super aged society by 2030 This book fills an important research gap by examining Singapore's efforts to achieve healthy ageing It draws on both semi structured interviews and secondary data e.g government documents journal articles books reports to examine hot topics such as financial wellness of older adults ageing in place dementia friendly communities and digital connection with older adults in the time of the 2019 coronavirus disease COVID 19 In the interviews experts and professionals provide valuable insights into the issue of healthy ageing in Singapore The book's goal is to provide a comprehensive portrait of healthy ageing in Singapore while also sharing valuable lessons to help other countries achieve healthy ageing *Latest*

Advances on Excitatory Synapse Biology Kimberly M. Huber, Pierre Paoletti, P. Jesper Sjöström, 2021-11-25 **Singapore's**

Health Care System: What 50 Years Have Achieved Kandiah Satkunanantham, Chien Earn Lee, 2015-11-13 How did Singapore's health care system transform itself into one of the best in the world It not only provides easy access but its standards of health care not only in curative medicine but also in prevention are exemplary Fifty years ago the infant mortality rate IMR was 26 per thousand live births today the IMR is 2 Life expectancy was 64 years then today it is 83 The Singapore Medicine brand is trusted internationally and patients are drawn to Singapore from all over the world And while many countries struggle to finance their health care Singapore has developed a health care financing framework that makes health care affordable for its people and gives sustainability to the health care system Reliability is provided by a professional workforce that seeks to continually learn improve and become ever more proficient with cutting edge technology while emphasizing the relational aspects of health care by nurturing compassion and maintaining high standards of integrity Convenience and safety are enhanced by a unifying IT system that enables the portability of medical records across health care institutions All these have been achieved not by chance but by careful planning strong leadership and dedicated people who are prepared to learn from Singapore's own experience while adapting best practices from around the world But the

system is not without challenges not least those of an aging population and an increasing market influence This book provides a fascinating insight into the development of Singapore's health care system from the early days of fighting infections and providing nutrition supplementation for school children to today's management of lifestyle diseases and high end tertiary care It also discusses how the system must adapt to help Singaporeans continue to live well live long and with peace of mind
