**Edition)** Charles C. Mann,2006-10-10 NATIONAL BESTSELLER A groundbreaking work of science history and archaeology that radically alters our understanding of the Americas before the arrival of Columbus in 1492 from a remarkably engaging writer The New York Times Book Review Contrary to what so many Americans learn in school the pre Columbian Indians were not sparsely settled in a pristine wilderness rather there were huge numbers of Indians who actively molded and influenced the land around them The astonishing Aztec capital of Tenochtitlan had running water and immaculately clean streets and was larger than any contemporary European city Mexican cultures created corn in a specialized breeding process that it has been called man s first feat of genetic engineering Indeed Indians were not living lightly on the land but were landscaping and manipulating their world in ways that we are only now beginning to understand Challenging and surprising this a transformative new look at a rich and fascinating world we only thought we knew **1491** Charles C.

Mann,2005-08-09 A groundbreaking study that radically alters our understanding of the Americas before the arrival of the Europeans in 1492 Traditionally Americans learned in school that the ancestors of the people who inhabited the Western Hemisphere at the time of Columbus s landing had crossed the Bering Strait twelve thousand years ago existed mainly in

small nomadic bands and lived so lightly on the land that the Americas was for all practical purposes still a vast wilderness. But as Charles C. Mann now makes clear, archaeologists and anthropologists have spent the last thirty years proving these and many other long-held assumptions wrong. In a book that startles and persuades, Mann reveals how a new generation of researchers equipped with novel scientific techniques came to previously unheard-of conclusions. Among them: In 1491, there were probably more people living in the Americas than in Europe. Certain cities such as Tenochtitlan, the Aztec capital, were far greater in population than any contemporary European city. Furthermore, Tenochtitlan, unlike any capital in Europe at that time, had running water, beautiful botanical gardens, and immaculately clean streets. The earliest cities in the Western Hemisphere were thriving before the Egyptians built the great pyramids. Pre-Columbian Indians in Mexico developed corn by a breeding process so sophisticated that the journal *Science* recently described it as man's first and perhaps the greatest feat of genetic engineering. Amazonian Indians learned how to farm the rain forest without destroying it, a process scientists are studying today in the hope of regaining this lost knowledge. Native Americans transformed their land so completely that Europeans arrived in a hemisphere already massively landscaped by human beings. Mann sheds clarifying light on the methods used to arrive at these new visions of the pre-Columbian Americas and how they have affected our understanding of our history and our thinking about the environment. His book is an exciting and learned account of scientific inquiry and revelation.

**Atlas of Travel and Tourism Development** Myra Shackley, 2007-03-14 From travel in the ancient and classical world to the growth of underwater tourism in the Great Barrier Reef and the influence of the Gulf War on regional tourism, the *Atlas of Travel and Tourism Development* is a new departure from conventional texts, providing a unique overview of the growth of the tourism industry. Divided into three sections, the text looks first at the past, examining the influence of global geography on travel patterns, and provides an overview of the history of travel and tourism. It then moves onto the present, using a regional framework to demonstrate how the physical and historical geography of each area is related to tourism development. The final section provides a forecast of future trends for the next two decades.

**The Readers' Advisory Guide to Nonfiction** Neal Wyatt, 2007-05-14 Navigating what she calls the extravagantly rich world of nonfiction, renowned readers advisor RA Wyatt builds readers advisory bridges from fiction to compelling and increasingly popular nonfiction, to encompass the library's entire collection. She focuses on eight popular categories: history, true crime, true adventure, science, memoir, food, cooking, travel, and sports. Within each, she explains the scope, popularity, style, major authors, and works, and the subject's position in readers advisory interviews. Wyatt addresses who is reading nonfiction and why, while providing RAs with the tools and language to incorporate nonfiction into discussions that point readers to what to read next. In easy-to-follow steps, Wyatt explains the hows and whys of offering fiction and nonfiction suggestions together. Illustrates ways to get up to speed fast in nonfiction. Shows how to lead readers to a variety of books using her read-around and reading map strategies. Provides tools to build nonfiction subject guides for the collection. This hands-on guide includes

nonfiction bibliography key authors benchmark books with annotations and core collections It is destined to become the nonfiction bible for readers advisory and collection development helping librarians library workers and patrons select great reading from the entire library collection     *Thinking about the Elgin Marbles* John Henry Merryman,2009-06-10 The new edition of this insightful work begins with a critical reexamination of the rival Greek and British claims to the Elgin Marbles That case study identifies the questions that continue to dominate the growing international debate about cultural property policy and which are subsequently explored in a newly expanded array of essays Why are people concerned about cultural property Is cultural nationalism a sound organizing principle for dealing with cultural property questions Or is it a relic of 19th century romanticism kept alive by the power of Byron s poetry How can one rationalize cultural nationalism with the idea that works of art and antiquities are the cultural heritage of all mankind What are alternative ways of thinking about cultural property policy and law The work goes on to pay particular attention to the law and policy relating to cultural property export controls and the evolution and development of the 1995 UNIDROIT Convention on the Return of Stolen and Illegally Exported Cultural Property The second part of this highly regarded book addresses a number of contemporary art law issues in essays on counterfeit art the moral rights of artists the artist s resale right droit de suite the litigation over the Mark Rothko estate and problems of museum trustee negligence conflict of interests and misuse of inside information The author John Henry Merryman is an Emeritus and Affiliated Professor in the Department of Art at Stanford Law School He is a widely respected authority in the fields of international cultural property and art law     Archaeology Gaynor Aaltonen,2021-04-01 Spanning multiple eras across the entire globe this accessible book provides wonderful introduction to archaeology and the discoveries which have changed our world Piece by painstaking piece archaeology has helped us to rewrite the history of Homo sapiens Gaynor Aaltonen digs deep into major expeditions and the artifacts they uncovered from the forgotten Anasazi empire of the American southwest to the discovery of King Richard III s remains beneath a Leicester car park Topics include Submerged cities from Jamaica s Port Royal to Italy s Bacoli Technological advancements such as carbon dating Native American structures including Montezuma Castle Mayan and Aztec city states This book provides an expansive overview of human history told through the materials we have left behind     **True Crime Narratives** Ben Harrison,1997 Takes the reader on an exploration of this genre from the mid nineteenth century through 1993     Encyclopedia of Anthropology H. James Birx,2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories     **International White Collar Crime** Bruce Zagaris,2015-08-10 The only book on international white collar crime remains an invaluable tool for business law and law enforcement     *Trafficking Culture* Simon Mackenzie,Neil Brodie,Donna Yates,Christos Tsirogiannis,2019-08-15 Trafficking Culture outlines current research and thinking on the illicit market in antiquities It moves along the global trafficking chain from source to market identifying

the main roles and routines involved Using original research the authors explore the dynamics of this grey market where legal and illegal goods are mixed and conflated It compares and contrasts this illicit trade with other transnational criminal markets such as the illegal trades in wildlife and diamonds The analytical frames of organized crime and white collar crime drawn from criminology provide a fresh perspective on a problem that has tended to be seen as archaeological rather than criminological Bringing insights from both disciplines together this book represents a productive discourse between experts in these two fields working together for several years to produce the evidence base that is reported here Innovative forms of regulation are the most productive way to explore crime control in this field and this book provides a series of propositions about practical crime reduction measures for the future It will be invaluable to academics working in the fields of archaeology criminology art history museum studies and heritage The book will also be a vital resource for professionals in the field of cultural property protection and preservation
