Los Braceros Memories Of Bracero Workers 19421964:

Braceros Deborah Cohen, 2011-02-15 At the beginning of World War II the United States and Mexico launched the bracero program a series of labor agreements that brought Mexican men to work temporarily in U S agricultural fields In **Braceros** Deborah Cohen asks why these migrants provoked so much concern and anxiety in the United States and what the Mexican government expected to gain in participating in the program Cohen creatively links the often unconnected themes of exploitation development the rise of consumer cultures and gendered class and race formation to show why those with connections beyond the nation have historically provoked suspicion anxiety and retaliatory political policies **Los**

diverse disciplines **Term Paper Resource Guide to Latino History** Michael P. Moreno, Kristin C.

Brunnemer, 2010-09-02 This resource guide to 100 key events in Latino history provides students, librarians, and scholars with hundreds of original and compelling term paper ideas and the key print and electronic sources needed for research. Latinos are the largest, fastest growing minority group in the United States, and the ways they have positively impacted our nation are significant and undeniable. This book examines the contributions of Latinos to U.S. history, providing hundreds of possible topics for term papers and research projects, along with primary, secondary, web, and multimedia sources of topical information. Subjects such as the Treaty of Guadalupe Hidalgo 1848, the Bracero Program 1942, the United Farm Workers of America Is Formed 1962, and The Great American Boycott A Day Without Immigrants of 2006 are just a few samples of the topics included. Each historical event is described briefly, followed by direction toward specific research and writing topics for the student historian. At least two alternative term paper suggestions complement these ideas, allowing creative original approaches to historical inquiries.

Disability Studies and the Environmental Humanities Sarah Jaquette Ray, Jay Sibara, 2017-06 Although scholars in the environmental humanities have been exploring the dichotomy between wild and built environments for several years, few have focused on the field of disability studies, a discipline that enlists the contingency between environments and bodies as a foundation of its scholarship. On the other hand, scholars in disability studies have demonstrated the ways in which the built environment privileges some bodies and minds over others, yet they have rarely examined the ways in which toxic environments engender chronic illness and disability or how environmental illnesses disrupt dominant paradigms for scrutinizing disability. Designed as a reader for undergraduate and graduate courses, *Disability Studies and the Environmental Humanities* employs interdisciplinary perspectives to examine such issues as slow violence, imperialism, race toxicity, eco-sickness, the body in environmental justice, ableism, and other topics. With a historical scope spanning the seventeenth century to the present, this collection not only presents the foundational documents informing this intersection of fields but also showcases the most current work, making it an indispensable reference.

They Saved the Crops Don Mitchell, 2012 At the outset of World War II, California agriculture seemed to be on the cusp of change. Many Californians, reacting to the ravages of the Great Depression, called for a radical reorientation of the highly exploitative labor relations that had allowed the state to become such a productive farming frontier. But with the importation of the first braceros (guest workers from Mexico) hired on an emergency basis after the United States entered the war, an even more intense struggle ensued over how agriculture would be conducted in the state. Esteemed geographer Don Mitchell argues that by delineating the need for cheap, flexible farm labor as a problem and solving it via the importation of relatively disempowered migrant workers, an alliance of growers and government actors committed the United States to an agricultural system that is, in important respects, still with us. *They Saved the Crops* is a theoretically rich and stylistically innovative account of grower rapaciousness, worker militancy, rampant corruption, and bureaucratic bias. Mitchell shows that growers

workers and officials confronted a series of problems that shaped and were shaped by the landscape itself For growers the problem was finding the right kind of labor at the right price at the right time Workers struggled for survival and attempted to win power in the face of economic exploitation and unrelenting violence Bureaucrats tried to harness political power to meet the demands of as one put it the people whom we serve Drawing on a deep well of empirical materials from archives up and down the state Mitchell s account promises to be the definitive book about California agriculture in the turbulent decades of the mid twentieth century
