Comparative Structure and Evolution of Cerebral Cortex, Part I Edward G. Jones, Alan Peters, 2013-06-29 The cerebral cortex especially that part customarily designated neocortex is one of the hallmarks of mammalian evolution and reaches its greatest size relatively speaking and its widest structural diversity in the human brain The evolution of this structure as remarkable for the huge numbers of neurons that it contains as for the range of behaviors that it controls has been of abiding interest to many generations of neuroscientists Yet few theories of cortical evolution have been proposed and none has stood the test of time In particular no theory has been successful in bridging the evolutionary gap that appears to exist between the pallium of

nonmammalian vertebrates and the neocortex of mammals. Undoubtedly this stems in large part from the rapid divergence of non-mammalian and mammalian forms and the lack of contemporary species whose telencephalic wall can be seen as having transitional characteristics. The monotreme cortex for example is unquestionably mammalian in organization and that of no living reptile comes close to resembling it. Yet anatomists such as Ramon y Cajal on examining the finer details of cortical structure were struck by the similarities in neuronal form particularly of the pyramidal cells and their predisposition to laminar alignment shared by representatives of all vertebrate classes.

Biological Exuberance Bruce Bagemihl, 2000-04-10
 A Publishers Weekly Best Book One of the New York Public Library's 25 Books to Remember for 1999 Lavishly illustrated and meticulously researched filled with fascinating facts and astonishing descriptions of animal behavior Bruce Bagemihl's *Biological Exuberance* is a landmark book that will change forever how we look at nature. Homosexuality in its myriad forms has been scientifically documented in more than 450 species of mammals birds reptiles insects and other animals worldwide. *Biological Exuberance* is the first comprehensive account of the subject bringing together accurate accessible and nonsensationalized information. Drawing upon a rich body of zoological research spanning more than two centuries Bagemihl shows that animals engage in all types of nonreproductive sexual behavior. Sexual and gender expression in the animal world displays exuberant variety including same sex courtship pair bonding sex and co-parenting even instances of lifelong homosexual bonding in species that do not have lifelong heterosexual bonding. Part 1: A Polysexual Polygendered World begins with a survey of homosexuality transgender and nonreproductive heterosexuality in animals and then delves into the broader implications of these findings including a valuable perspective on human diversity. Bagemihl also examines the hidden assumptions behind the way biologists look at natural systems and suggests a fresh perspective based on the synthesis of contemporary scientific insights with traditional knowledge from indigenous cultures. Part 2: A Wondrous Bestiary profiles more than 190 species in which scientific observers have noted homosexual or transgender behavior. Each profile is a verbal and visual snapshot of one or more closely related bird or mammal species containing all the documentation required to support the author's often controversial conclusions.

Toward a Theory of Neuroplasticity Christopher A. Shaw, Jill McEachern, 2013-03-07 This book provides a broad survey of many of the major areas in neuroplasticity research by leading investigators in the field. The topics considered range across all levels of nervous system organization from the molecular to behavioral levels for species ranging from *C. elegans* to humans. In addition the effects of development and neuropathological events are discussed. A final summary chapter synthesizes the data gathered in this volume in order to provide the basis for a general theory of neuroplasticity.

Animal Traditions Eytan Avital, Eva Jablonka, 2000-11-23 *Animal Traditions* maintains that the assumption that the selection of genes supplies both a sufficient explanation of the evolution and a true description of its course is despite its almost universal acclaim wrong. Eytan Avital and Eva Jablonka contend that evolutionary explanations must take into account the well established fact that in mammals and birds the transfer of learnt information is

both ubiquitous and indispensable The introduction of the behavioural inheritance system into the Darwinian explanatory scheme enables the authors to offer new interpretations for common behaviours such as maternal behaviours behavioural conflicts within families adoption and helping This approach offers a richer view of heredity and evolution integrates developmental and evolutionary processes suggests new lines for research and provides a constructive alternative to both the selfish gene and meme views of the world It will make stimulating reading for all those interested in evolutionary biology sociobiology behavioural ecology and psychology

Avian Energetics and Nutritional Ecology C. Carey, 2012-12-06 A symposium held in 1973 chaired and organized by William R Dawson was the first major attempt to summarize and synthesize the existing information in the then emerging field of avian energetics The symposium featured papers by James R King William A Calder III Vance A Tucker and Robert E Ricklefs and commentaries by George A Bartholomew S Charles Kendeigh and Eugene P Odum The proceedings of the symposium *Avian Energetics* Paynter 1974 played a critical role in stimulating interest and research in the field of avian energetics Some twenty odd years later we are making another attempt to summarize the information in the field of avian energetics Some obvious differences exist between its predecessor and this volume Numerous improvements in methodology such as the use of doubly labeled water to estimate metabolism in free living birds now allow researchers to ask questions that could not be addressed previously Second consideration of nutrition is now inseparable from that of energetics This merger is necessary not only because food intake is the source of both energy and nutrients but also because one or more nutrients rather than energy can be limiting for a given species in a particular instance Finally the study of energetics and nutritional ecology particularly in birds and mammals has grown so dramatically that a single volume can now only partially cover the range of possible topics and can catalogue only a sampling of all the studies on the subject

and Lowell Wood The Cockatoos Edward John Mulawka, 2016-04-28 This reference book on the cockatoo family provides a comprehensive physical description of the various species of this exotic parrot the habitat they favor and their distribution and behaviors both in the wild and in captivity Their reproductive history is examined as is the possibility of breeding sufficient numbers in captivity to develop sustainable populations for re introduction to their original habitat should they become extinct in the wild The book explores the historical encounters of the various species with Europeans two centuries ago That early history provides considerable insight to the cockatoo s popularity and to efforts to breed them in captivity Many cockatoo species face a perilous future As their native forests are logged the cockatoos lose not only suitable nesting and roosting sites but native foods Additionally despite conservation laws governing the capture of wild cockatoos their desirability as an avian pet has spawned a worldwide illicit trade critically endangering some species to the point that they face extinction in the wild *Manual of Parrot Behavior* Andrew Luescher, 2008-02-28 This authoritative reference the first of its kind is a necessary addition to the library of any practitioner or behaviorist who sees avian companion animals Because of their beauty intelligence playfulness and ability in mimicry parrots are the most widely kept companion birds It is estimated that more than half of the psittacine cases presented to clinicians are the result of behavioral problems problems inherent to captivity Bringing together a host of international experts on avian behavior *Manual of Parrot Behavior* explores the many facets of psittacine behavior both normal and abnormal The book not only provides readers with a solid understanding of the basic principles of psittacine behavior but also offers useful techniques of diagnosis and treatment for specific problems Covers both normal and abnormal parrot behavior Offers practical techniques on diagnosis and treatment of behavior problems Written by a team of international experts on avian behavior A necessary addition to the library of any practitioner of behaviorist who sees avian companion animals The Hawaiian Spinner Dolphin Kenneth S. Norris, Bernd Wursig, Randall S. Wells, Melany Wursig, 1994-08-30 Twenty years in the making by a distinguished dolphin expert and his associates *The Hawaiian Spinner Dolphin* is the first comprehensive scientific natural history of a dolphin species ever written From their research camp at Kealakekua Bay in Hawaii these scientists followed a population of wild spinner dolphins by radiotracking their movements and with the use of a windowed underwater vessel observing the details of their underwater social life The authors begin with a description of the spinner dolphin species its morphology and systematics and then examine the ocean environment the organization of dolphin populations and the way this school based society of mammals uses shorelines for rest and instruction of the young The dolphins reproductive cycle their vision vocalization hearing breathing and feeding and the integration of the school are carefully analyzed The authors conclude with a comprehensive evolutionary analysis of this marine cultural system with its behavioral flexibility and high levels of cooperation This absorbing book is the richest source available of new scientific insights about the lives of wild dolphins and how their societies evolved at sea *Sleep and Aging* Mark P. Mattson, 2005-06-20 The book describes the mechanisms

involved in the maintenance of neuroendocrine immune interactions in ageing The lack of this maintenance leads to the appearance of age related diseases cancer infections dementia and subsequent disability The capacity of some hormones or nutritional factors in restoring and remodelling the neuroendocrine immune response during ageing is reported presenting possible new anti ageing strategies in order to reach healthy ageing and longevity

Ecology and Evolution of Acoustic Communication in Birds Donald E. Kroodsma, Edward H. Miller, 1996 With song often serving dual strategies of territorial defense and female attraction studies using playback techniques have shown how birds interact demonstrated difference between males and females in the perception of sounds

My Parrot, My Friend Bonnie Munro Doane, Thomas Qualkinbush, 2008-04-21 *My Parrot My Friend* is a straightforward book that addresses a growing need for parrot owners and their birds When difficulties develop in the home or a clash in avian and human natures makes for unhappy birds and angry owners many times the sad consequence is painful termination of what could have been a long term joyful relationship

Happily there is an effective remedy and it lies in a program of behavior modification That program is fully detailed in this well written wonderfully detailed text In addition the text helps readers to find the right bird so problems can be sidestepped altogether and it explains which birds not to consider and why *My Parrot My Friend* shows how parrots grow and develop and how behavioral problems can start The book explains behavioral modification how it works and how to apply it in specific situations Case studies and an examination of pertinent issues add considerable interest to the text These and other special features make this one of the most indispensable reference books you will ever use *My Parrot My Friend* is the first book to approach the subject in such depth for the lay reader It will make a significant difference in how pet owners view and relate to their birds and will point the way to happy endings where once there were none

Current Ornithology D.M. Power, 2012-12-06 In Volume 12 eminent international ornithologists further elucidate endocrinological correlates of mating strategies and hormones and reproductive behavior assess the value of the brood reduction hypothesis in explaining the paradox of hatching asynchrony and explore the validity and sensitivity of growth bands in feathers as an indication of nutritional condition and the use of feather banding in studying growth Chapters are well supported with charts maps schematic diagrams and photographs *Current Ornithology* is the only English language publication currently devoted exclusively to extensive reviews and synthesis of topics pertaining to all aspects of the biology of birds Chapters fall under such diverse rubrics as ecology evolution behavior phylogeny behavioral ecology anatomy and physiology and conservation biology All authors are leading authorities on their subjects and each chapter is refereed by experts in the topics covered Although all chapters focus primarily on birds some topics such as the social cognition of birds as compared to primates Volume 13 have significant application to disciplines outside of ornithology *Current Ornithology* aims to provide an accessible up to date accurate source of data and to contribute to conceptual generalization and unification across the biological sciences
