## **Loving A Psychological Approach:**

Loving: a Psychological Approach Howard Lee Miller, Paul S. Siegel, 1972      *The Psychology of Love* Robert J. Sternberg, Michael L. Barnes, 1988-01-01 Psychologische studie over het verschijnsel liefde      **Psychology of Love 101** Karin Sternberg, 2014 Print CourseSmart      Handbook of the Sociology of Emotions Jan E. Stets, Jonathan H. Turner, 2007-10-10 Since the 1970s the study of emotions moved to the forefront of sociological analysis This book brings the reader up to date on the theory and research that have proliferated in the analysis of human emotions The first section of the book addresses the classification the neurological underpinnings and the effect of gender on emotions The second reviews sociological theories of emotion Section three covers theory and research on specific emotions love envy empathy anger grief etc The final section shows how the study of emotions adds new insight into other subfields of sociology the workplace health and more      **The New Psychology of Love** Robert J. Sternberg, Karin Sternberg, 2019 This is a much needed update on the latest theory and research on love supplied by leading scientific experts It is suitable for psychologists neuroscientists anthropologists sociologists and anyone with an interest in love and what has been learned from scientific studies of it

*The Right To Be Loved* S. Matthew Liao, 2015-10-01 S Matthew Liao argues here that children have a right to be loved To do so he investigates questions such as whether children are rightholders what grounds a child's right to be loved whether love is an appropriate object of a right and other philosophical and practical issues His proposal is that all human beings have rights to the fundamental conditions for pursuing a good life therefore as human beings children have human rights to the fundamental conditions for pursuing a good life Since being loved is one of those fundamental conditions children thus have a right to be loved Liao shows that this claim need not be merely empty rhetoric and that the arguments for this right can hang together as a coherent whole This is the first book to make a sustained philosophical case for the right of children to be loved It makes a unique contribution to the fast growing literature on family ethics in particular on children's rights and parental rights and responsibilities and to the emerging field of the philosophy of human rights      *The Science and Theology of Godly Love* Matthew T. Lee, Amos Yong, 2012-06-15 Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity the essays gathered in *The Science and Theology of Godly Love* explore the potential for collaboration between social science and theology They do so within the context of the interdisciplinary study of Godly Love which examines the perceived experience of loving God being loved by God and thereby being motivated to engage in selfless service to others This volume serves as an introduction to and a call for further research in this new field of study offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians Drawing on the work of Douglas Porpora and others the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope Godly Love does not force a theistic explanation on data instead these essays show that it sensitizes researchers so that they can take seriously

the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth

*The Science of Compassionate Love* Beverley Fehr, Susan Sprecher, Lynn G. Underwood, 2009-01-26 The Science of Compassionate Love is an interdisciplinary volume that presents cutting edge scholarship on the topics of altruism and compassionate love The book Adopts a social science approach to understanding compassionate love Emphasizes positive features of social interaction Encourages the appropriate expression of compassionate love both to those in intimate relationships and to strangers Includes articles by distinguished contributors from the fields of Psychology Sociology Communication Studies Family Studies Epidemiology Medicine and Nursing Is ideal for workshops on compassionate love Positive Psychology and creating constructive interactions between health professionals and patients [The Psychology of Love](#) Michele A. Paludi, 2012-03-09 From arranged marriages to online dating this four volume work presents everything from personal accounts to empirical evidence to document what creates love in our culture as well as around the world The field of biology views love as a hard wired mammalian drive akin to thirst and hunger In contrast psychology views love from a social and cultural perspective where our drive to find love and our responses to it are highly dependent on societal norms In *The Psychology of Love* esteemed author and educator Michele A Paludi examines love through all lenses thereby providing readers a deeper understanding of the ways we can express caring sensitivity empathy and respect toward one another Each chapter in this comprehensive four volume work includes a scholarly overview of empirical research and theories about the psychology of love In addition individuals own definitions of love are included Special attention is paid to accepted standards of love across a variety of cultures the ways individuals express liking and love across the lifecycle and patterns in dissolutions of friendships and romantic relationships making note of gender and race differences [Oxford Studies in Experimental Philosophy Volume 3](#) Tania Lombrozo, Joshua Knobe, Shaun Nichols, 2020-04-10 The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field It features papers by philosophers papers by psychologists and papers co authored by people in both disciplines The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions The papers in this third volume illustrate the ways in which the field continues to broaden taking on new methodological approaches and interacting with substantive theories from an ever wider array of disciplines Some recent research in experimental philosophy is going more deeply into well established questions in the field while other strands of research are exploring issues that scarcely appeared in the field even a few years ago Thus we see the introduction of new empirical and statistical methods network analysis new theoretical approaches formal semantics and the development of entirely new interdisciplinary connections in the emerging field of experimental jurisprudence *Revolution - Sex, Gender and Spirituality - Love Set Free* Richard Bruvoll Jr., 2024-04-25 Did you know that religion whether you re

religious or not is the single topic that has had the most profound impact on the species of human beings David Fontana

Reading this book you will be reminded of the human madness and frequently evil attitudes and actions throughout recorded history Much of it probably unknown to many of you Our time s narratives have become cultural truths as so many times before in our history I would recommend that you read about key conceptual explanations and models in Part I before embarking on the journey through this dramatic history of humanity Disclaimer This book is not recommended for people with high blood pressure especially if you are an extreme left wing Darwinist or an extreme right wing Abrahamist You ve hereby been warned Have a good read and learning experience Especially the NDE s Life review stage or more precisely The Life relive stage as the psychologist and researcher Kenneth Ring puts it This stage resembles both Dante s inferno and the biblical purgatory but with a very interesting twist to it This stage is also the route to go in order to prevent aggressive behavior on all levels The NDE Code connecting the dots Richard Bruvoll Jr Blokus Denmark July 2020      **Sacred Love and Sexual Fascination Juxtaposed in Eleven Minutes** Raihan,2021-12-27 Raihan MA B Ed English UGC NET English Research Scholar English Dr APJ Abdul Kalam University Indore Hailing from Thalassery Kerala Raihan is an avid traveller numismatist and a passionate cricketer with zest and zeal in English Literature Done Graduation BA Post Graduation MA in English Language Literature from the prestigious Gov t Brennen College Avid passion in teaching landed him at the threshold of Gov t Brennen College of Teacher Education Thalassery completing Bachelor of Education B Ed Presently persuing Ph D from Dr APJ Abdul Kalam University Indore in English His research on Paulo Coelho s works are intriguing titled as Spiritual and Psychological Metamorphosis of the Individual with Reference to the Selected Novels of Paulo Coelho He is an author of 6 UGC approved Journals and have presented 4 Papers at International Conferences held in Mumbai Gwalior on various themes of Paulo Coelho s works His Ambition is to develop a creative awareness in the field of English Literature with new perspectives      **The Nature of Love** Irving Singer,1984 In this concluding volume of his impressive study of the history of Western thought about the nature of love Irving Singer reviews the principal efforts that have been made by 20th Century thinkers to analyze the phenomenon of love T he bulk of the book is taken up with critical accounts of the modern thinkers who have systematically called into question the possibility itself of love as a union of distinct human selves For the most part these critiques are effectively executed and they bring a high level of critical acumen to bear on skeptical theses about love that are now too often accepted as truisms Frederick A Olafson Los Angeles Times Book Review Irving Singer has developed a method of historical analysis flexible enough to deal with all kinds of love from Greek homosexual love in Plato to the philia and agape of the New Testament to the courtly love of medieval romance to the Romantics for whom love was magic This final volume brings us to the present In The Modern World Singer offers readings of Freud Proust and Sartre among others He shows how their work was formed in reaction to the 19th century ideal of merging of the identities of lover and beloved More often than not the great modern writers portray love as impossible as a

field of failure and regret This masterpiece of critical thinking is a timely eloquent and scrupulous account of what after all still makes the world go round Thomas D Evelyn Christian Science Monitor This is the third of a three volume history of the philosophy of love It begins with Kierkegaard Tolstoy and Nietzsche in the nineteenth century and treats Freud Proust Bergson D H Lawrence G B Shaw Santayana Sartre and others in the twentieth Although the author s approach is primarily historical he intersperses critical remarks throughout Most of the major themes which are discussed by philosophers of love make their way into this history including friendship sexual love and the distinction between love that is based on the value of the beloved and love that bestows value on the beloved Singer devotes a number of pages to his own views on falling in love being in love and staying in love Singer s exposition is lucid and organized his criticisms are insightful Ethics In this third volume of historical overview of the development of the Western conception of love Singer uses writers philosophers and psychologists to provide the reader with an overview of love in the late 19th and 20th century Analyzing authors such as Tolstoy Proust D H Lawrence and Shaw and philosophers such as Nietzsche Kierkegaard Sartre and Santayana as well as Freud Singer links each contributor s thoughts to the influence of previous writers and also provides some psycho historical insight into their personal lives that might have been either a source or direct result of their views In this final volume Singer proceeds to look at not just the great men influence but also provides a chapter overviewing scientific contributions to our understanding of love Singer s work is a significant contribution to understanding the social construction of important abstract social and personal values By tracing love through different historical periods through a variety of voices Singer has created a rich history of the struggle between the ideal and the real between the dreams of what love should provide and the reality of what relationships have been in each historical period By personalizing the voice through psychohistorical analysis Singer also provides insight into the shaping of ideas through the intimate struggles of the shapers Mark V Chaffee

Contemporary Psychology      *The Psychology of Love* Thiago de Almeida, David L. Rodrigues, 2025-01-16 The topic of loving relationships is one of the most important and often problematic areas of people s lives Unfortunately such importance is best perceived when relationships are unsatisfactory and or threatened by the possibility of an imminent breakup When that happens our mood our ability to concentrate our energy our work and our health among other dimensions of our lives can be profoundly affected Although contemporary love life appears to be markedly different from that of predecessor generations given the wide range of current relationships as the hook up living together separate cohabitation virtual love or even betrayal among many other forms of loving interaction we live in a time when relationships between two or more people it seems need more understanding and more accurate research However studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation Because it can be considered such a familiar concept many researchers should agree on what love is and how it can be measured But this is not what occurs After all what is love Is it as a psychological phenomenon capable of being scientifically studied by psychology

The goal of this Research Topic is to Promote and disseminate publications related to what is conceived scientifically as the Psychology of Love differing from conceptions related to self help and common sense Conceptualize love through psychological science Systematize knowledge about the nature of love and related phenomena such as jealousy shyness inhibition infidelity and other related topics Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non monogamous relationships Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction

**The Routledge Handbook of Love in Philosophy** Adrienne M. Martin, 2019-01-15 The Routledge Handbook of Love in Philosophy collects 39 original chapters from prominent philosophers on the nature meaning value and predicaments of love presented in a unique framework that highlights the rich variety of methods and traditions used to engage with these subjects This volume is structured around important realms of human life and activity each of which receives its own section I Family and Friendship II Romance and Sex III Politics and Society IV Animals Nature and the Environment V Art Faith and Meaning VI Rationality and Morality VII Traditions Historical and Contemporary This last section includes chapters treating love as a subject in both Western and non Western philosophical traditions The contributions all appearing in print here for the first time are written to be accessible and compelling to non philosophers and philosophers alike and the volume as a whole encourages professional philosophers teachers students and lay readers to rethink standard constructions of philosophical canons
