Lucy Growing Up Human:

Lucy : Growing Up Human : a Chimpanzee Daughter in a Psychotherapist's Family, 1975 Lucy's incredibly human like behavior is described as well as her family relationships sexual development and participation in encounter group sessions

Chimpanzee Travels Dale Peterson, 2003 A lifelong fascination with primates led Dale Peterson to Africa which he crisscrossed in hope of sighting chimpanzees in the wild As with any adventure worth retelling however Peterson's detours are as notable as his destinations With the good natured fatalism of the tested traveler Peterson tells of trains and riverboats opportunists and ecotourists rain forests and shantytowns as he conveys the pitfalls of going forth on a budget as tiny as the continent is vast Along the way we also meet Jane Goodall and several other renowned primate researchers and caretakers This is travel writing with a purpose an account that inspires both admiration and concern for Africa's people places and natural diversity

Animal Tool Behavior Robert W. Shumaker, Kristina R. Walkup, Benjamin B. Beck, 2024-12-10 This revised and updated edition of the landmark publication reveals the current state of knowledge regarding animal tool behavior When originally published in 1980 *Animal Tool Behavior* was the first volume to catalog and analyze the complete literature on tool use and manufacture in non human animals Benjamin B Beck showed how animals from insects to primates employed different types of tools to solve numerous problems This work inspired and energized legions of researchers to study the use of tools by a wide variety of species This new edition reveals the current state of knowledge regarding animal tool behavior updated and revised with 300 additional references that have been published since the second edition Through a comprehensive synthesis of studies produced through 2023 Robert W Shumaker Kristina R Walkup and Benjamin B Beck define tool use discuss the modes of tool use that have emerged in the scientific literature examine all forms of tool manufacture and address common myths about non human tool use Specific examples involving invertebrates birds fish and mammals describe the differing levels of sophistication of tool use exhibited by animals This volume provides a thorough framework for understanding animal tool use and manufacture

The Oxford Handbook of the Development of Play Anthony D. Pellegrini, 2011 The role of play in human development has long been the subject of controversy Despite being championed by many of the foremost scholars of the twentieth century play has been dogged by underrepresentation and marginalization in literature across the scientific disciplines The Oxford Handbook of the Development of Play marks the first attempt to examine the development of children's play through a rigorous and multidisciplinary approach Comprising chapters from the foremost scholars in psychology anthropology and evolutionary biology this handbook resets the landscape of developmental science and makes a compelling case for the benefits of play Edited by respected play researcher Anthony D Pellegrini The Oxford Handbook of the Development of Play is both a scientific accomplishment and a shot across the bow for parents educators and policymakers regarding the importance of children's play in both development and learning

Perv Jesse Bering, 2013-10-08 As a sex writer Jesse Bering is fearless and peerless Dan Savage You are a sexual deviant A

pervert through and through We may not want to admit it but as the award winning columnist and psychologist Jesse Bering reveals in *Perv* there is a spectrum of perversion along which we all sit Whether it s voyeurism exhibitionism or your run of the mill foot fetish we all possess a suite of sexual tastes as unique as our fingerprints and as secret as the rest of the skeletons we ve hidden in our closets Combining cutting edge studies and critiques of landmark research and conclusions drawn by Sigmund Freud Alfred Kinsey and the DSM 5 Bering pulls the curtain back on paraphilias arguing that sexual deviance is commonplace He explores the countless fetishists of the world including people who wear a respectable suit during the day and handcuff a willing sexual partner at night But he also takes us into the lives of erotic outliers such as a woman who falls madly in love with the Eiffel Tower a pair of deeply affectionate identical twins those with a particular penchant for statues and others who are enamored of crevices not found on the human body Moving from science to politics psychology history and his own reflections on growing up gay in America Bering confronts hypocrisy prejudice and harm as they relate to sexuality on a global scale Humanizing so called deviants while at the same time asking serious questions about the differences between thought and action he presents us with a challenge to understand that our best hope of solving some of the most troubling problems of our age hinges entirely on the amoral study of sex As kinky as it is compassionate illuminating and engrossing *Perv* is an irresistible and deeply personal book I can t promise you an orgasm at the end of our adventure Bering writes but I can promise you a better understanding of why you get the ones you do

A Foot in the River Felipe Fernández-Armesto,2015 We are a weird species Like other species we have a culture But by comparison with other species we are strangely unstable human cultures self transform diverge and multiply with bewildering speed They vary radically and rapidly from time to time and place to place And the way we live our manners morals habits experiences relationships technology values seems to be changing at an ever accelerating pace The effects can be dislocating baffling sometimes terrifying Why is this In *A Foot in the River* best selling historian Felipe Fernandez Armesto sifts through the evidence and offers some radical answers to these very big questions about the human species and its history and speculates on what these answers might mean for our future Combining insights from a huge range of disciplines including history biology anthropology archaeology philosophy sociology ethology zoology primatology psychology linguistics the cognitive sciences and even business studies he argues that culture is exempt from evolution Ultimately no environmental conditions no genetic legacy no predictable patterns no scientific laws determine our behaviour We can consequently make and remake our world in the freedom of unconstrained imaginations A revolutionary book which challenges scientific assumptions about culture and how and why cultural change happens *A Foot in the River* comes to conclusions which readers may well find by turns both daunting and also potentially hugely liberating

The Trojan Horse and Other Stories Julia Kindt,2024-01-11 How does the non human help define the human This powerful exploration of ten mythical creatures reveals who we really are

Animals and African Ethics Kai Horsthemke,2015-07-21 The claim is frequently made on behalf of African moral

beliefs and practices that they do not objectify and exploit nature and natural existents like Western ethics does This book investigates whether this is correct and what kind of status is reserved for other than human animals in African ethics

Nim Chimpsky Elizabeth Hess,2008 Chronicles an experiment with a young chimpanzee who was brought up with a human family and taught to use sign language proficiently until the funding for the study ended and he spent two decades shuttled in and out of various facilities

Eating Apes Dale Peterson,2003-05 Eating Apes is an eloquent book about a disturbing secret the looming extinction of the African great apes In bringing the facts of this crisis into a single accessible book Peterson takes readers one step closer to averting one of the most disturbing threats to our closest relatives 16 photos

Language Frederick J. Newmeyer,1988 Linguistics The Cambridge Survey is a comprehensive introduction to current research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon from language acquisition to discourse analysis Each chapter has been written by a specialist particularly distinguished in his or her field who has accepted the challenge of reviewing the current issues and future prospects in sufficient depth for the scholar and with sufficient clarity for the student Each volume can be read independently and has a particular focus Volume I covers the internal structure of the language faculty itself while Volume II considers the evidence for and the implications of a generativist approach to language Psycholinguistics and neurolinguistics are covered in Volume III and Volume IV concentrates on sociolinguistics and the allied fields of anthropological linguistics and discourse and conversation analysis Several of the chapters in the work concentrate on the interface between different aspects of linguistic theory or the boundaries between linguistic theory and other disciplines Thus in both its scope and in its approach the Survey is a unique and fundamental reference work It undoubtedly fulfills the editor s aims of providing a wealth of information insight and ideas that will excite and challenge all readers with an interest in linguistics

Growing Up Human Brenna Hassett,2022-06-30 Brings the science of biological anthropology to bear on understanding how our evolutionary history has shaped a phenomenon everyone has experienced childhood Tracking deep into our evolutionary history anthropological science has begun to unravel one particular feature that sets us apart from the many many animals that came before us our uniquely long childhoods Growing Up Human looks at how we have diverged from our ancestral roots to stay forever young or at least what seems like forever and how the evolution of childhood is a critical part of the human story Beginning with a look at the ways animals invest in their offspring the book moves through the many steps of making a baby from pair bonding to hidden ovulation points where our species has repeatedly stepped off the standard primate path From the mystery of monogamy to the minefield of modern parenting advice biological anthropologist Brenna Hassett reveals how differences between humans and our closest cousins lead to our messy mating systems dangerous pregnancies and difficult births and what these tell us about the kind of babies we are trying to build Using observations of our closest primate relatives the tiny

relics of childhood that come to us from the archaeological record and the bones and teeth of our ancestors science has started to unravel the evolution of our childhood right down the fossil record In our species investment doesn't stop at birth and as *Growing Up Human* reveals we can compare every aspect of our care and feeding from the chemical composition of our milk to our fondness for formal education from ancient times onwards in order to understand just what we evolved our weird and wonderful childhoods for

Chimpanzee Kevin D. Hunt, 2020-08-20 The chimpanzee is one of our planet's best loved and most instantly recognisable animals Splitting from the human lineage between four and six million years ago it is along with its cousin the bonobo our closest living relative sharing around 94% of our DNA First encountered by Westerners in the seventeenth century virtually nothing was known about chimpanzees in their natural environment until 1960 when Jane Goodall travelled to Gombe to live and work with them Accessibly written yet fully referenced and uncompromising in its accuracy and comprehensiveness this book encapsulates everything we currently know about chimpanzees from their discovery and why we study them to their anatomy physiology genetics and culture The text is beautifully illustrated and infused with examples and anecdotes drawn from the author's thirty years of primate observation making this a perfect resource for students of biological anthropology and primatology as well as non specialists interested in chimpanzees **On**
