española José Alemany Bolúfer, 1917 **The Intricacy of Languages** Francesc Feliu, Olga Fullana, 2019-10-15 If as we believe the history of languages is the history of the construction of an ideal artefact that permits a specific interpretation of the linguistic reality and helps to approve and assimilate a certain zone of diversity enabling the accumulation of collective historical knowledge and making us identify it with a social community and a territory then it must be agreed that languages are extremely complex entities The new linguistic diversity that cultural globalisation and recent population movements have installed in most traditional linguistic territories has probably put the ideology of the national language into a state of crisis and as a consequence has made the ancient intrinsic diversity of all languages visible at least to the extent that this is still possible Nowadays then the old linguistic diversity of dialects of parlances of local lexicons and the cultural forms that are reflected in these varieties and previously unsuccessful linguistic entities has been given a new opportunity in a world where the cohesion of societies and the welfare of citizens must be guaranteed using all available means Looked at this way the intricacy of languages may even open up an opportunity for local economic and social development *Bulletin*, 1917

Lexicografía de las lenguas románicas María José Domínguez Vázquez, Xavier Gómez Guinovart, Carlos Valcárcel Riveiro, 2014-12-12 El gran avance de la lexicografía en los últimos tiempos en particular de la lexicografía referida a las lenguas romances hace necesaria una presentación actualizada de la misma en sus diversas vertientes A este objetivo responde la presente obra avalada por el prestigio de quienes han colaborado en ella El primer volumen supone una puesta al día de los conocimientos en lexicografía románica desde la perspectiva histórica Junto a trabajos más puntuales sobre aspectos de especial interés podemos encontrar visiones globalizadoras de la historia de la lexicografía en las distintas lenguas También se incluyen estudios que inciden en la elaboración de diccionarios en su dimensión diacrónica El segundo volumen hace lo propio con los trabajos que tienen que ver con la lexicografía moderna y contrastiva así como con aquellos cuya atención se centra en la teoría y técnica lexicográficas y en las orientaciones que últimamente se siguen en la confección de repertorios léxicos Al integrar en un mismo espacio los estudios correspondientes a las diferentes lenguas se intenta sobrepasar el ámbito de las lexicografías individuales y favorecer el análisis de sus interconexiones Por ello esta obra puede suponer una aportación de conjunto innovadora sobre el tema abordado
