B. de Erro [ed. by G. W. Erving].** Juan Bautista de Erro y Azpiroz, 1829 **The Alphabet of the Primitive Language of Spain** Juan Bautista de Erro y Azpiroz, 1829 *Numeral Philosophy* Albert Christy, 1983-05-01 **Philosophies of the Sciences** Fritz Allhoff, 2009-11-19 A collection of essays discussing a wide range of sciences and the central philosophical issues associated with them presenting the sciences collectively to encourage a greater understanding of their associative theoretical foundations as well as their relationship to each other Offers a new and unique approach to studying and comparing the philosophies of a variety of scientific disciplines Explores a wide variety of individual sciences including mathematics physics chemistry biology psychology sociology and economics The essays are written by leading scholars in a highly accessible style for the student audience Complements more traditional studies of philosophy of science **Medieval Number Symbolism** Vincent Foster Hopper, 2000-01-01 In this classic study a noted scholar reveals how deeply rooted in medieval thought was the consciousness of numbers not as mathematical tools nor yet as the counters in a game but as fundamental realities alive with memories and eloquent with meaning **The Billboard**, 1928 **Number and Numbers** Alain Badiou, 2018-05-18 The political regime of global capitalism reduces the world to an endless network of numbers within numbers but how many of us really understand what numbers are Without such an understanding how can we challenge the regime of number In *Number and Numbers* Alain Badiou offers an philosophically penetrating account with a powerful political subtext of the attempts that have been made over the last century to define the special status of number Badiou argues that number cannot be defined by the multiform calculative uses to which numbers are put nor is it exhausted by the various species described by number theory Drawing on the mathematical theory of surreal numbers he develops a unified theory of Number as a particular form of being an infinite expanse to which our access remains limited This understanding of Number as being harbours important philosophical truths about the structure of the world in which we live In Badiou's view only by rigorously thinking through Number can philosophy offer us some hope of breaking through the dense and apparently impenetrable capitalist fabric of numerical relations For this will finally allow us to point to that which cannot be numbered the possibility of an event that would deliver us from our unthinking subordination of number **An Introductory Treatise on Sanscrit Hagiographa, Or, The Sacred Literature of the Hindus** Richard Wrightson, 1859 *The Eastern Mysteries* David Allen Hulse, 2000 UNLOCK THE MEANING OF EASTERN MAGICK In scope and clarity there is no book that can compare to *The Eastern Mysteries* This reissue of David Allen Hulse's landmark work is the one book all students of the occult must own It catalogs and distills in hundreds of tables of secret symbolism the true import of each ancient Eastern magickal tradition Each chapter is a key that

unlocks the meaning behind one of the magickal languages Through painstaking research and analysis Hulse has accomplished an unprecedented feat that of reconstructing the basic underlying systems that form the vast legacy of mystery traditions The real genius of this accomplishment is that it is presented in a way that is immediately understandable and usable Although the book deals with many foreign scripts ancient tongues and lost symbols it is designed for the beginning student Included is a wealth of cross references excellent introductory material and overviews an extensive annotated bibliography and new to this edition a complete index **Religion, Enlightenment and Empire** Jessica

Patterson,2021-12-16 In the second half of the eighteenth century several British East India Company servants published accounts of what they deemed to be the original and ancient religion of India Drawing on what are recognised today as the texts and traditions of Hinduism these works fed into a booming enlightenment interest in Eastern philosophy At the same time the Company s aggressive conquest of Bengal was facing a crisis of legitimacy and many of the prominent political minds of the day were turning their attention to the question of empire In this original study Jessica Patterson situates these Company works on the Hindu religion in the twin contexts of enlightenment and empire In doing so she uncovers the central role of heterodox religious approaches to Indian religions for enlightenment thought East India Company policy and contemporary ideas of empire The Monist Paul Carus,1896 Vols 2 and 5 include appendices **"The" Monist** ,1894

Number and Numbers Alain Badiou,2008-05-19 The political regime of global capitalism reduces the world to an endless network of numbers within numbers but how many of us really understand what numbers are Without such an understanding how can we challenge the regime of number In Number and Numbers Alain Badiou offers an philosophically penetrating account with a powerful political subtext of the attempts that have been made over the last century to define the special status of number Badiou argues that number cannot be defined by the multiform calculative uses to which numbers are put nor is it exhausted by the various species described by number theory Drawing on the mathematical theory of surreal numbers he develops a unified theory of Number as a particular form of being an infinite expanse to which our access remains limited This understanding of Number as being harbours important philosophical truths about the structure of the world in which we live In Badiou s view only by rigorously thinking through Number can philosophy offer us some hope of breaking through the dense and apparently impenetrable capitalist fabric of numerical relations For this will finally allow us to point to that which cannot be numbered the possibility of an event that would deliver us from our unthinking subordination of number **Index to the Subject Catalogue of Harvard College Library** Harvard University. Library,1891

Lectures on the Origin and Growth of Religion as Illustrated by Some Points in the History of Indian Buddhism Thomas William Rhys Davids,1881 **Astrology and Numerology in Medieval and Early Modern Catalonia** John Scott Lucas,2003-09-01 The Tractat de prenostication de la vida natural dels h mens a late fifteenth century Catalan incunable draws on a rich tradition of astrological magic geomancy Pythagorean numerology and Hebrew gematria This practical

manual offers a method of determining the birth sign based on calculations performed on the subject's name and his or her mother's name. The critical edition includes a literary historical and linguistic study, an English translation, and a Catalan-English glossary. The Tractat reveals Catalan sources for prognostication, a unique expression of medieval syncretism, the mingling of traditions, and the development of new ideas. It is a rare find for Hispanists and others interested in astrology, magic, the history of science, and early print culture.
