A Typology of Numeral Systems in South Asian Languages Kumari Mamta, 2024-04-10 This book takes a journey into the fascinating world of numerical systems in South Asian languages offering a unique exploration of the intricate patterns cultural nuances and historical significance embedded within the numerical frameworks of the given languages It blends the discovery of new facts with the reinterpretation of existing ones while developing a methodology for investigating number systems that can be applied to languages around the world It is a groundbreaking study that unveils the complex linguistic patterns and socio cultural significance of numerical systems in South Asian languages offering valuable insights for researchers linguists anthropologists and language enthusiasts alike By bridging the gap between linguistics anthropology cultural studies and mathematics this book encourages interdisciplinary dialogue and collaboration by examining numeral systems from multiple angles

Numeral Classifiers and Classifier Languages Chungmin Lee, Young-Wha Kim, Byeong-Uk Yi, 2021-02-17 Focusing mainly on classifiers Numeral Classifiers and Classifier Languages offers a deep investigation of three major classifier languages Chinese Japanese and Korean This book

provides detailed discussions well supported by empirical evidence and corpus analyses Theoretical hypotheses regarding differences and commonalities between numeral classifier languages and other mainly article languages are tested to seek universals or typological characteristics The essays collected here from leading scholars in different fields promise to be greatly significant in the field of linguistics for several reasons First it targets three representative classifier languages in Asia It also provides critical clues and suggests solutions to syntactic semantic psychological and philosophical issues about classifier constructions Finally it addresses ensuing debates that may arise in the field of linguistics in general and neighboring inter disciplinary areas This book should be of great interest to advanced students and scholars of East Asian languages

Empirische Dimension Altorientalischer Forschungen Gebhard J. Selz, Klaus Wagensonner, 2011 This volume s 23 contributions from senior and younger researchers working with the Ancient Near Eastern heritage are based on the hypothesis of a general empiric attitude of Ancient Mesopotamian scholarship The articles try to elucidate these underlying principles making use of various sorts of modern theories and methods The book covers a broader range of topics astronomy politics agriculture and irrigation linguistics architecture medicine and others

The Materiality of Numbers Karenleigh A. Overmann, 2023-05-25 This is a book about numbers what they are as concepts and how and why they originate as viewed through the material devices used to represent and manipulate them Fingers tallies tokens and written notations invented in both ancestral and contemporary societies explain what numbers are why they are the way they are and how we get them Overmann is the first to explore how material devices contribute to numerical thinking initially by helping us to visualize and manipulate the perceptual experience of quantity that we share with other species She explores how and why numbers are conceptualized and then elaborated as well as the central role that material objects play in both processes Overmann s volume thus offers a view of numerical cognition that is based on an alternative set of assumptions about numbers their material component and the nature of the human mind and thinking

Plurality and Classifiers across Languages in China Dan Xu, 2012-12-19 Plural marking numeral classifiers and reduplication constitute the main means of quantification marking in the domain of grammar The contributions in this book focus on the typological correlation between the three different strategies for quantification as well as on some general issues A better understanding of the quantification strategies in the languages of China will enrich our comprehension of human language and thought The book is expected to have an impact on the study of linguistic typology language contact and patterns of the evolution

major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region

Numbers as Cognitive Tools César Frederico dos Santos, 2025-08-19 This book offers a novel account of the nature of numbers firmly grounded in results from numerical cognition and the philosophy of mathematics Drawing on empirical data on the human experience of what we call numbers the author shows that numbers do not exist as abstract objects but that the idea that they do is a useful cognitive tool Contrary to the platonist view according to which arithmetic is true of a realm of abstract entities the nominalistic account presented in this book shows arithmetic to be true of descriptions of structural properties of techniques such as counting and calculating procedures This book is of interest to both philosophers and cognitive scientists who want to have a deeper understanding of what numbers are Language in Time and Space Brigitte

L.M. Bauer, Georges-Jean Pinault, 2011-03-01 The honoree of this Festschrift has for many years now marked modern trends in diachronic and synchronic linguistics by his own publications and by stimulating those of numerous others This collection of articles presents data oriented studies that integrate modern and traditional approaches in the field thus reflecting the honoree's contribution to contemporary linguistics The articles relate to comparative data from early Indo European languages and a variety of other languages and discuss the theoretical implications of phenomena such as linguistic universals reconstruction and language classification Tocharian Studies Václav Blažek, 2014-01-01 Kniha je souborem

Classifier Structures in Mandarin Chinese Niina Ning Zhang, 2013-05-28 This monograph addresses fundamental syntactic issues of classifier constructions based on a thorough study of a typical classifier language Mandarin Chinese It shows that the contrast between count and mass is not binary Instead there are two independently attested features Numerability the ability of a noun to combine with a numeral directly and Delimitability the ability of a noun to be modified by a delimitive modifier such as size shape or boundary modifier Although all nouns in Chinese are non count nouns there is still a mass non mass contrast with mass nouns selected by individuating classifiers and non mass nouns selected by individual classifiers Some languages have the counterparts of Chinese individuating classifiers only some languages have the counterparts of Chinese individual classifiers only and some other languages have no counterpart of either individual or individuating classifiers of Chinese The book also reports that unit plurality can be expressed by reduplicative classifiers in the language Moreover for the constituency of a numeral expression an individual individuating or kind classifier combines with the noun first and then the numeral is integrated but a

partitive or collective classifier like a measure word combines with the numeral first before the noun is integrated into the whole nominal structure Furthermore the book identifies the syntactic positions of various uses of classifiers in the language A classifier is at a functional head position that has a dependency with a numeral or a position that has a dependency with a generic or existential quantifier or a position that represents the singular plural contrast or a position that licenses a delimitive modifier when the classifier occurs in a compound

A Grammar of Nuosu Matthias Gerner, 2013-10-14 This is the first modern grammar of Nuosu written in English Nuosu belongs to a little known section of Tibeto Burman The 2.5 Million ethnic Nuosu are part of the Yi nationality and live in Sichuan China This grammar informs Tibeto Burman linguists typologists scholars of language contact and foreign learners of Nuosu

The Oxford Handbook of Word Classes Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research

A Typological Approach to Grammaticalization and Lexicalization Janet Zhiqun Xing, 2020-01-20 Based on comparative analyses of diachronic data the articles in this volume address both theoretical and methodological issues in the study of grammaticalization and lexicalization in both Eastern and Western languages The central question raised and discussed in this volume is how if any typological properties of the two genetically unrelated language families interact with the processes of grammaticalization and lexicalization

Studies of Chinese Linguistics Janet Zhiqun Xing, 2009-02-01 The nine essays in this volume present the most recent developments in the study of Chinese linguistic research using functional approaches Topics discussed in the volume include Chinese typology word order variation word formation semantic change cognition discourse analysis interface among syntax semantics and pragmatics and grammaticalization Studies of Chinese Linguistics will be a valuable and stimulating reference for graduate students and researchers interested in functional linguistics Readers in general and applied linguistics will also appreciate the insights it offers into the interaction of Chinese form and function

The Diachrony of Classification Systems William B.

McGregor, Søren Wichmann, 2018-05-14 Classification is a popular topic in typological descriptive and theoretical linguistics

This volume is the first to deal specifically with the diachrony of linguistic systems of classification. It comprises original papers that examine the ways in which linguistic classification systems arise, change and dissipate in both natural circumstances and in circumstances of attrition. The role of diffusion in such processes is explored as well as the question of what can be diffused. The volume is not restricted to nominal systems of classification but also includes papers dealing with the less well known phenomenon of verbal classification. Languages from a wide spread of world regions are examined including Africa, Amazonia, Australia, Eurasia, Oceania and Mesoamerica. The volume will be of interest to linguistic typologists, descriptive linguists, historical linguists and grammaticalization theorists. *Historical Linguistics 2011* Ritsuko

Kikusawa, Lawrence A. Reid, 2013-11-14 This volume of selected papers from the 20th International Conference on Historical Linguistics, Osaka, Japan, July 2011, presents a set of stimulating and ground breaking studies on a wide range of languages and language families. As the scope of studies that can be characterized as Historical Linguistics has expanded, ICHL conferences have likewise seen a broadening of topics presented and this conference was no exception, reflected by the inclusion in this volume of a plenary presentation on the grammaticalization of expressions of negation and gendered kinship in American Sign Language. Three other papers propose new views of the role of grammaticalization in English, Chinese and Niger Congo languages. Four of the papers discuss specific problems that arise in the comparison and reconstruction of linguistic features in a range of languages from Asia, Europe and South America. The last six studies deal with innovative approaches to the historical development of suppletion in Romance languages, possessive classifiers in Austronesian, universal quantifiers in Germanic, adjectival sequences in English, exaptation in Celtic and Early English and drift in Ancient Egyptian.

Nominal Classification in Asia and Oceania Marc Allasonnière-Tang, Marcin Kilarski, 2023-12-01 Linguists have long been interested in systems of nominal classification due to their diverse functions as well as cognitive and cultural correlates. Among others, ongoing research has focused on semantic, functional and morphosyntactic properties of complex systems such as co-occurring gender and numeral classifiers. Such approaches have typically focused on the languages of north western South America and Papua New Guinea. This volume proposes to fill in a gap in existing research by focusing on Asia, based on case studies from languages belonging to a wide range of families, i.e. Austroasiatic, Austronesian, Dravidian, Hmong-Mien, Indo-European, Mongolic, Sino-Tibetan and Tai-Kadai, as well as the language isolate Nivkh. Gender and classifiers in these languages are approached within several different perspectives, i.e. functional, typological and diachronic, thus revealing complex patterns in their lexical and pragmatic functions as well as origin, development and loss. Describing and analysing such properties is a unique and innovative contribution of the volume.

The Top Books of the Year Numeral Types And Changes Worldwide The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Numeral Types And Changes Worldwide : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
