The Oxford Handbook of Mutual, Co-Operative, and Co-Owned Business Jonathan Michie, Joseph R. Blasi, Carlo Borzaga, 2017-03-30 The Oxford Handbook of Mutuals and Co Owned Business investigates all types of member owned organizations whether consumer co operatives agricultural and producer co operatives worker co operatives mutual building societies friendly societies credit unions solidarity organizations mutual insurance companies or employee owned companies Such organizations can be owned by their consumers the producers or the employees whether through single stakeholder or multi stakeholder ownership This complex set of organizations is named differently across countries from mutual in the UK to solidarity cooperatives in Latin America In some countries such organizations are not even officially recognized and thus lack a specific denomination For the sake of clarity this Handbook will refer to member owned organizations to encompass the variety of non investor owned organizations and in the national case study chapters the terms used will be those most widely employed in that country These alternative corporate forms have emerged in a variety of economic sectors in almost all advanced economies since the time of the industrial revolution and the development of capitalism through the subsequent creation and dominance of the limited liability company Until recently these organizations were generally regarded as a rather marginal component of the economy However over the past few years member owned organizations have come to be seen in some countries at least as potentially attractive in light of their ability to tackle various economic and social concerns and their relative resilience during the financial and economic crises of 2007 2013

Geriatric Palliative Care Suzanne Goldhirsch, 2014-03-21 The growing

geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties Yet palliative medicine lacks the resources to carry such a workload itself Geriatric Palliative Care addresses this need by encouraging individual specialties to own the management of elderly with the same vigor as they own other key management competencies within their specialty This clinically focused and highly practical handbook which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier Oxford University Press 2003 encourages this process of learning and ownership across many medical specialties Designed to be readable and easily accessible to a range of health care providers Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients The handbook also provides evidence based advice for helping patients relatives and staff cope with such issues as polypharmacy dementia and consent multiple pathologies home care elderly caregivers and supporting the elderly in the place where they would like to be *White-collar Pay* ,1989

Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki,2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population
