Nursing Quality Assurance:

Quality Assurance in Nursing National Nursing and Midwifery Consultative Committee. Working Group on Quality Assurance in Nursing, Scottish Home and Health Department, Jennifer Ross, Scottish Health Service Planning Council, 1988

We have attempted to achieve two basic but essential objectives to initiate wide discussion of the issue of quality in the nursing profession in Scotland and to provide nurses at all levels with the core of the information they will need to establish the systems of quality assurance In order to facilitate the development of standards at the local level the following model statement of standards is proposed for adoption nationally

- 1 Philosophy The nurse subscribes to a philosophy of nursing which defines a distinct goal for nursing and enables her to recognise her role as a health professional
- 2 Practice The nurse adopts the systematic approach to nursing practice and documents the care she provides
- 3 Patient Care The nurse accepts responsibility for initiating maintaining and terminating the caring relationship with her patient
- 4 Professionalism The nurse practices in accordance with the statutes policies and codes of conduct governing nursing

This statement will require to be discussed extensively throughout the professional and managerial structures of nursing in Scotland
