On Literature Selected Articles:

On Literature Maxim Gorky, 2001-03-01 It is to books that I owe everything that is good in me Even in my youth I realized that art is more generous than people are I am a book lover each one of them seems a miracle to me and the author a magician I am unable to speak of books otherwise than with the deepest emotion and a joyous enthusiasm That may seem ridiculous but it is the truth It will probably be said that this is the enthusiasm of a barbarian let people say what they will I am beyond cure Maxim Gorky

A Myanmar Miscellany: Selected Articles, 2007-2023 Andrew Selth, 2024-09-30 Andrew Selth has been watching Myanmar for 50 years During this time he has published 10 books and more than 400 other works about the country In 2020 he released a collection of almost 100 articles that had been posted on the Lowy Institute's Interpreter website This second anthology brings together another 72 articles written for a range of outlets between 2007 and 2023 This period saw the installation of a disciplined democracy under Aung San Suu Kyi the 2021 military coup and the country's descent into a bitter civil war Many of the articles in the book deal with international relations and security issues but there are also works on Myanmar's history politics and culture as well as some personal reminiscences Together they make a unique contribution from an Old Myanmar Hand with wide ranging interests and insights

MEDLARS and Health Information Policy United States. Congress. Office of Technology Assessment, 1982 The objectives of this technical memorandum are 2 fold to examine the US National Library of Medicine's NLM role in the creation and distribution of computerized health related bibliographic information in light of the private sector's presence in this field and the public interest and to examine MEDLARS effectiveness in disseminating bibliographic health related information 5 chapters describe the development current status and future plans for MEDLARS databases and online services discuss system issues related to the effectiveness of MEDLARS in disseminating bibliographic health related

information review private sector health related databases and commercial information services focus on the considerations underlying the current debate on the appropriate role of the government in information transfer and analyze the domestic and international implications of changing the range and pricing structure of MEDLARS computerized products and services. Since its inception MEDLARS has become more sophisticated accessible and inclusive and MEDLARS 2 the library's current system is utilized more than any other system by health communities in the US and abroad. The development of MEDLARS parallels the evolution in medical bibliography that began in the 1950s with the 1st attempt to apply computer technologies to information processing. The system's 1st database MEDLINE was a byproduct of the computerized production of the printed Index Medicus. Index Medicus continues to provide physicians and other health professionals the major access to biomedical literature worldwide. NLM is continuously refining MEDLARS 2 to extend its capabilities. The system has evolved into a complex multiprocessing system that maintains data files provides online retrieval services and produces computer photocomposed publications. MEDLARS 2 contains almost 20 databases. The machine readable data tape that is the source of data for MEDLINE is used to produce Index Medicus and other publications. MEDLINE with its related backfiles is the largest database in MEDLARS and is the most extensively used. Literature selection is used as a quality filter for the indexed biomedical literature database. The selection process is highly structured and involves a critical review of the literature by a panel of expert consultants. In fiscal year 1981 NLM conducted over 2 million online searches fully 1/3 of all such searches performed in the US. MEDLARS 2 allows for direct communication with the computer in online interactive fashion.
