The Essence of Multivariate Thinking Lisa L. Harlow, 2005-02-17 The Essence of Multivariate Thinking is intended to make multivariate statistics more accessible to a wide audience To encourage a more thorough understanding of multivariate methods author Lisa Harlow suggests basic themes that run through most statistical methodology The most pervasive theme is multiplicity The author argues that the use of multivariate methods encourages multiple ways of investigating phenomena She explains that widening our lens to identify multiple theories constructs measures samples methods and time points provide greater reliability and validity in our research Dr Harlow then shows how these themes are applied to several multivariate methods with the hope that this will ease understanding in the basic concepts of multivariate thinking Formulas are kept at a minimum The first three chapters review the core themes that run through multivariate methods Seven different multivariate methods are then described using 10 questions that illuminate the main features uses multiplicity themes interpretations and applications The seven methods covered are multiple regression analysis of covariance multivariate analysis of variance discriminant function analysis logistic regression canonical correlation and principal components factor analysis The final chapter pulls together the principal themes and features charts that list common themes and how they pertain to each of the methods discussed The Essence of Multivariate Thinking features A unique focus on the underlying themes that run through most multivariate methods A dual focus on significance tests and effect sizes to encourage readers to adopt a thorough approach to assessing the significance and magnitude of their findings A detailed example for each method to delineate how the multivariate themes apply Tabular results from statistical analysis programs that mirror sections of the output files A common dataset throughout the chapters to provide continuity with the variables and research questions A CD with data SAS
