The Oxford Handbook of Professional Economic Ethics George F. DeMartino, Deirdre N. McCloskey, 2016-01-04 For over a century the economics profession has extended its reach to encompass policy formation and institutional design while largely ignoring the ethical challenges that attend the profession's influence over the lives of others Economists have proven to be disinterested in ethics Embracing emotivism they often treat ethics a matter of mere preference Moreover economists tend to be hostile to professional economic ethics which they incorrectly equate with a code of conduct that would be at best ineffectual and at worst disruptive to good economic practice But good ethical reasoning is not reducible to mere tastes and professional ethics is not reducible to a code Instead professional economic ethics refers to a new field of investigation a tradition of sustained and lively inquiry into the irrepressible ethical entailments of academic and applied economic practice The Oxford Handbook of Professional Economic Ethics explores a wide range of questions related to the nature of ethical economic practice and the content of professional economic ethics It explores current thinking that has emerged in these areas while widening substantially the terrain of economic ethics There has never been a volume that poses so directly and intensively the question of the need for and content of professional ethics for economics The Handbook incorporates the work of leading scholars and practitioners including academic economists from various theoretical traditions applied economists beyond academia whose work has direct and immense social impact and philosophers professional ethicists and others whose work has addressed the nature of professionalism and its implications for ethical practice

Change a Life, Change your Own Peter Ove, 2018-06-11T00:00:00Z Change a Life Change Your Own is a long overdue adult discussion about how child sponsorship a spectacularly successful fundraising tool infantilizes both donor and recipient turning good intentions into paternalism and reinforcing stereotypical Western ideas about helplessness and hopelessness in developing countries Ian Smillie author of The Charity of Nations Freedom from Want and Diamonds Change a Life Change Your Own For less than a dollar a day For the cost of one coffee a day With these slogans and their accompanying images of poor children some of the world's largest development organizations invite the global North to engage in one of their most prominent and successful fundraising techniques child sponsorship But as Peter Ove argues in Change a Life Change Your Own child sponsorship is successful not because it addresses the needs of poor children but because it helps position what it means to live ethically in an unequal and unjust world In this way child sponsorship is seen as more than an effective marketing tool it is a powerful mechanism for spreading particular ideas about the global South the global North and the relationship between the two Through sponsorship the desire to raise money secure appropriate childhoods and become better people ends up taking priority over the goal of living together well on a global scale Drawing on in depth interviews with child sponsors and sponsorship staff Change a Life Change Your Own explores the contexts in which sponsorship promotional material is produced interpreted

and acted upon This is not an expos on the use of sponsorship dollars or high administrative costs it is a clearly written and compelling account of how the problem of development is constructed such that child sponsorship is seen to be a rational and ethical solution *Development in the Third World: From Policy Failure to Policy Reform* Kempe Ronald Hope, Sr.,2016-09-16 This book is a study of Third World economic development and the factors which have made development so elusive It discusses the policy reform necessary to spur development as well as the relationship between development theory and policy The author argues that the key to successful development policy is through reduced state intervention and that to the extent state intervention is necessary it should be through rather than against the market mechanism *The Administration of International Organizations* Michael D.V. Davies,2017-07-05 Drawing on his extensive practical experience as an international civil servant in a number of organizations Davies writes in a lively and readable manner about all aspects of administrative policy and its related implications Divided into two parts the first Top down will enable policy makers in government academia and elsewhere who have an interest in the proper governance and management of international institutions to gain fresh insight into the topic The second part Bottom up provides a substantial body of knowledge of administrations including case studies of best and worse practice The book includes analysis of The UN system International Financial Institutions Co ordinated Organizations Regional European Institutions The Consultative Group for International Agricultural Research This is a work that fills a well defined gap in organizational knowledge in a rigorous but accessible way It is essential reading for both practitioners and academics involved with international organizations
