Visions of the Land Michael A. Bryson, 2002-06-29 The work of John Charles Fremont Richard Byrd Charlotte Perkins Gilman John Wesley Powell Susan Cooper Rachel Carson and Loren Eiseley represents a widely divergent body of writing Yet despite their range of genres including exploration narratives technical reports natural histories scientific autobiographies fictional utopias nature writing and popular scientific literature these seven authors produced strikingly connected representations of nature and the practice of science in America from about 1840 to 1970 Michael A Bryson provides a thoughtful examination of the authors their work and the ways in which science and nature unite them Visions of the Land explores how our environmental attitudes have influenced and been shaped by various scientific perspectives from the time of western expansion and geographic exploration in the mid nineteenth century to the start of the contemporary environmental movement in the twentieth century Bryson offers a literary critical analysis of how writers of different backgrounds scientific training and geographic experiences represented nature through various kinds of natural science from natural history to cartography to resource management to ecology and evolution and in the process explored the possibilities and limits of science itself Visions of the Land examines the varied sometimes conflicting but always fascinating ways in which we have defined the relations among science nature language and the human community Ultimately it is an extended meditation on the capacity of using science to live well within nature **Biographical Dictionary of American and Canadian Naturalists and Environmentalists** George A. Components of Ecosystems Mark J. McDonnell,Steward T.A. Pickett,2012-12-06 This book a product of the fourth Cary Conference amply demonstrates the achievement of a major goal of all Cary Conferences That is Cary Conferences were conceived to provide a forum for comprehensive discussion of major ecological issues from more philosophical and comprehensive perspectives The Institute of Ecosystem Studies is proud to make its staff and facilities available on a biennial basis for the purpose of initiating and fostering these important discussions On the one hand the influence of humans on ecosystems may be quite obvious such as when a forest is cut On the other humans live within and among ecosystems but ecologists largely have avoided making detailed and rigorous analyses of the more subtle effects that human activities generate Indeed most ecologists have sought out rather pristine or remote areas for study rather than those which include humans This book brings together a stimulating mix of disciplines to highlight and evaluate these problems as well as the opportunities of including humans as integral components in studies of natural ecosystems An exciting dialogue has ensued

Hopefully this book will convey some of the excitement and challenges that were generated at this Cary Conference *Book Review Digest* ,1989 Excerpts from and citations to reviews of more than 8 000 books each year drawn from coverage of 109 publications Book Review Digest provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language Reviews of the following types of books are excluded government publications textbooks and technical books in the sciences and law Reviews of books on science for the general reader however are included The reviews originate in a group of selected periodicals in the humanities social sciences and general science published in the United States Canada and Great Britain Publisher *Encyclopedia of Religion and Nature* Bron Taylor,Jeffrey Kaplan,2005-01-01 No Marketing Blurb **Inside the Verse Novel** Linda Weste,2023-07-28 In these twenty two interviews with verse novelists from the UK USA Australia and Canada Linda Weste explores the uniqueness of storytelling through poetry and the genre of the verse novel Her subjects are notable representatives of countries where the genre thrives among them is Bernardine Evaristo joint winner of the Booker Prize in 2019 and what they have to say enriches our understanding of the many ways poetry and narratives can meld to create a unique reading experience *Choice* ,1992
