Chakras Vitales Juan Martínez, Chakras Vitales es una guía integral para quienes desean despertar alinear y fortalecer sus centros energéticos a través de prácticas accesibles y profundamente transformadoras Este libro ofrece un recorrido completo por los siete chakras principales revelando su influencia en el cuerpo la mente y las emociones y cómo su armonización puede traer bienestar claridad y equilibrio a todos los niveles del ser *El Ser y el Arquetipo Universal* Víctor Manuel Carrasco Belmont, 2020-08-13 El conocimiento del Ser y del Cosmos han sido siempre enigmas a resolver La filosofía y la ciencia han buscado descubrir a través de los tiempos la esencia física y metafísica del individuo y el Universo revelando progresivamente su esencia trascendente No obstante este avance a menudo se ve deturpado por posturas dicotómicas y mutuamente excluyentes Por ejemplo el Ser en su carácter psíquico es examinado principalmente por medio de dos orientaciones Una intenta describir los comportamientos del individuo a través de la interacción que este tiene con su ambiente sociocultural así como por el sentido interno que le da a dichas experiencias mostrando así una perspectiva meramente psicosocial Por otro lado se encuentra la postura organísmica la cual intenta explicar el comportamiento del individuo a través de las funciones del cuerpo físico Estas dos perspectivas han conseguido ampliar el conocimiento sobre la Psique del Ser y sus mecanismos internos y externos sin embargo tanto la perspectiva psicosocial como la organísmica

tienden a disminuirse entre sí. Así mismo ignoran en su gran mayoría el sentido profundo de la Psique es decir todos los procesos psíquicos y semimateriales correspondientes no solamente a la estructura Consciente sino también al Subconsciente e Inconsciente siendo que el discernimiento de dichos procesos permite una comprensión unificada y trascendente de la Psique. En otro sentido el Ser como parte del Universo o sea en su carácter físico mantiene igualmente posturas excluyentes entre sí y/o unilaterales. Por un lado está la concepción materialista sustentada principalmente por las disciplinas astrofísicas, físicoquímicas y biológicas las cuales se confrontan constantemente con pesquisas que no consiguen sustentar la esencia física y/o material del Universo y la existencia del Ser únicamente en la materia. Por otra parte se encuentra la desprestigiada concepción espiritualista que a pesar de sus dogmas absolutistas establecidos en varias de sus filosofías y al constante rechazo por parte de las academias se ha abierto camino al entendimiento positivo del Ser y del Universo como entes no solo materiales sino también semimateriales y psíquicos. Tanto la perspectiva materialista como la espiritualista intentan explicar el origen del Ser y del Universo no obstante mantienen normalmente una visión limitada. En ese sentido esta obra busca demostrar desde una perspectiva filosófica y científica el sentido ambivalente del Ser y del Universo tanto en su carácter psíquico transitorio y trascendente como en su sentido físico material y energético siendo que ambos muestran un conjunto de estructuras y procesos psíquicos como composiciones materiales y semimateriales. Aunado a lo anterior y tomando como base las polaridades antes mencionadas se busca demostrar la existencia de un Principio psíquico regulador del Universo denominado en esta obra como Arquetipo Universal. Finalmente cabe destacar que el tratado establecido en este libro simplemente coloca en contexto teorías ya desarrolladas por la humanidad a través de los tiempos incentivando únicamente a una comprensión amplia colectiva y ambivalente.
