Foreign Powers and Intervention in Armed Conflicts Aysegul Aydin,2012-07-11 Intervention in armed conflicts is full of riddles that await attention from scholars and policymakers This book argues that rethinking intervention redefining what it is and why foreign powers take an interest in others conflicts is of critical importance to understanding how conflicts evolve over time with the entry and exit of external actors It does this by building a new model of intervention that crosses the traditional boundaries between economics international relations theory and security studies and places the economic interests and domestic political institutions of external states at the center of intervention decisions Combining quantitative and qualitative evidence from both historical and contemporary conflicts including interventions in both interstate conflicts and civil wars it presents an in depth discussion of a range of interventions diplomatic economic and military in a variety of international contexts creating a comprehensive model for future research on the topic **U.S. Commitments to Foreign Powers** United States.
