A Review of the HHS Family Planning Program Institute of Medicine, Board on Children, Youth, and Families, Board on Health Sciences Policy, Committee on a Comprehensive Review of the HHS Office of Family Planning Title X Program, 2009-08-07 A Review of the HHS Family Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970 The program successfully provides family planning services to its target audience of low income individuals but there is room for improvement While the program's core goals are apparent a secondary set of changing priorities has emerged without a clear evidence based strategic process Also funding for the program has increased in actual dollars but has not kept pace with inflation or increased costs Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population At the same time the extent to which the program meets those needs cannot be assessed without a greater capacity for long term data collection A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program as well as to demonstrate its direct contribution to important end results such as reducing rates of unintended pregnancy cervical cancer and infertility The book will guide the Office of Family Planning toward improving the effectiveness of the program Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning policy makers researchers and professional organizations

Making Use of Deleuze in Planning Gareth Abrahams, 2016-10-04 Making Use of Deleuze in Planning translates and re creates some of Gilles Deleuze s most abstract philosophical concepts to form a new practicable planning assessment tool It shows what his philosophy can do for planning theory as well as planning assessment practice and in doing so sets out a pragmatic approach to Deleuzian studies one that helps form bridges between ontological problems and the problems found in professional practice It also breaks new ground in assessment methodology by challenging the essentialist ideas underpinning assessment methods like BREEAM and setting out and testing a new form of non essentialist assessment named SIAM The book argues that Deleuze s philosophy can be made useful to planning as long as one is prepared to adapt and re create his key ontological concepts to respond to the specific demands of the field
