Johnson, Donald Langmead, 1997 Biographical profiles of architects and engineers with proven influences on the course of a modern Western architecture Page xiii [Icons of Architecture](#) Sabine Thiel-Siling, 2005 An overview of twentieth century architecture featuring short essays on innovations in design and profiles of architects Includes photos drawings and building plans *Makers of Modern Architecture, Volume II* Martin Filler, 2013-08-20 In the first volume of *Makers of Modern Architecture* 2007 Martin Filler examined the emergence of that revolutionary new form of building and explored its aesthetic social and spiritual aspirations through illuminating studies of some of its most important practitioners from Louis Sullivan and Frank Lloyd Wright to in our own time Renzo Piano and Santiago Calatrava Now in *Makers of Modern Architecture Volume II* Filler continues his investigations into the building art beginning with the historical eclecticism of McKim Mead and White best remembered today for New York City's demolished Pennsylvania Station He surveys the seemingly inexhaustible flow of new books about Wright and Le Corbusier and continues his commentaries on Piano's museum buildings with an essay focused on the new Broad Contemporary Art Museum in Los Angeles There are less well known subjects here too from the Frankfurt urban planner Ernst May to Buckminster Fuller inventor of the geodesic dome Filler judges Edward Durell Stone the architect of the U S embassy in New Delhi the Huntington Hartford Museum in New York City and the Kennedy Center in Washington to have been a middling product of his times however personally interesting he may have been And he looks back at James Stirling who in the 1970s and 1980s was a veritable rock star of the profession

responsible for what Filler considers some of the very few worthwhile postmodernist buildings. The essays collected here are not entirely historical; however, Filler also focuses on some of the most recent projects to have attracted critical and popular attention both in the United States and abroad, including Rem Koolhaas's CCTV building in Beijing and Bernard Tschumi's Acropolis Museum in Athens. He argues that Kazuyo Sejima and Ryue Nishizawa's New Museum in New York City is one of those rare clarifying works of architecture that makes most recent buildings of the same sort look suddenly ridiculous. He calls Tod Williams and Billie Tsien's brilliant reimagining of the Barnes Collection in Philadelphia a latter-day miracle, a virtually unimprovable setting for its art. He finds Michael Arad's September 11 Memorial at Ground Zero a sobering, disturbing, heartbreaking, and overwhelming masterpiece. And he argues that Diller Scofidio + Renfro's Institute of Contemporary Art in Boston and their work revitalizing the High Line and Lincoln Center in New York make them today's shrewdest yet most sympathetic enhancers of the American metropolis. Filler remains in these nineteen essays a shrewd observer of the pressures on architects and their projects: money, politics, social expectations, even the weight of their own reputations. But his focus is always on the buildings themselves, on their sincerity and directness, on their form and their function, on their capacity to bring delight to the human landscape.

Contemporary Architecture Marta

Tobolczyk, 2021-07-05. This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way. The development of contemporary architecture is presented as it commenced more than a century ago, as it tried to reconcile democratic ideals with the forces of the Industrial Era. In contrast to many books on the modern-day art of building, the development of architecture is not described chronologically here but rather independently for each selective architectural trend. This allows a better explanation of some evolutionary processes and the continuity of each trend. Thanks to such an approach, this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools.

Building Children's Worlds Torsten Schmiedeknecht, Jill Rudd, Emma Hayward, 2023-03-28. Children are the future architects, clients, and users of our buildings. The kinds of architectural worlds they are exposed to in picturebooks during their formative years may be assumed to influence how they regard such architecture as adults. Contemporary urban environments, the world over, represent the various stages of modernism in architecture. This book reads that history through picturebooks and considers the kinds of national identities and histories they construct. Twelve specialist essays from international scholars address questions such as: Is modern architecture used to construct specific narratives of childhood? Is it taken to support negative narratives of alienation, on the one hand, and positive narratives of happiness, on the other? Do images of modern architecture support ideas of community, reinforce family values? If so, what kinds of architecture, community, and family? How is modern architecture placed vis-à-vis the promotion of diversity, ethnic, religious, gender, etc.? How might the use of architecture in comic strips or the presence of specific kinds of building in fiction aimed at younger adults be related to the groundwork laid in

picturebooks for younger readers This book reveals what stories are told about modern architecture and shows how those stories affect future attitudes towards and expectations of the built environment

The Ambiguous Legacy

of Socialist Modernist Architecture in Central and Eastern Europe Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects Journal of Contemporary Urban Affairs, Vol.2 No.1. 2018 Farhan Abdullah Ali, Ph.D. Candidate, Maryam Iranfar, Ph.D. Candidate, Donia Zhang, Dr., Rokhsaneh Rahbarianyazd, Dr., Layla Raswol, Dr., Leila Mirza, Dr., Hugh Byrd, Dr., Joseph Adeniran Adedeji, Dr., Olatunde Arayela, Dr., Joyce Lodson, Ph.D. Candidate, John Emmanuel Ogbaba, Ph.D. Candidate, Ugochukwu Kenechi Elinwa, Dr., Lawand Wirya Shawkat, MA., Salar Salah Muhy Al-Din, Ph.D. Candidate, Dusko Kuzovic, Dr., Najmaldin Hussein, MA., The Influence of Le Corbusier On the emergence of the Aesthetic Values in the Modern Architecture of Cyprus Farhan Abdullah Ali 1 12 <https://doi.org/10.25034/ijcua.2017.3651> The Presence of Modernist Architecture in Government s educational Buildings at Lefko a Maryam Iranfar 22 32 <https://doi.org/10.25034/ijcua.2018.3653> Classical Chinese Gardens Landscapes for Self Cultivation Donia Zhang 33 44 <https://doi.org/10.25034/ijcua.2018.3654> Evaluating energy consumption in terms of climatic factors A case study of Karakol residential apartments Famagusta North Cyprus Rokhsaneh Rahbarianyazd Layla Raswol 45 54 <https://doi.org/10.25034/ijcua.2018.3658> Towards appreciating the importance of windowscapes Evaluation and suggestion for improvement of New Zealand Building Code Leila Mirza Hugh Byrd 55 65 <https://doi.org/10.25034/ijcua.2018.3656> Aesthetics of Space Organization Lessons from Traditional European Cities Hourakhsh Ahmad Nia Yousif Hussien Suleiman 66 75 <https://doi.org/10.25034/ijcua.2018.3659> Urban Renewal Strategies and Economic Growth in Ondo State Nigeria A Case Study Joseph Adeniran Adedeji Olatunde Arayela 76 83 <https://doi.org/10.25034/ijcua.2018.3662> A
