Makers Of The Modern Theological Mind Teilhard De Chardin:

Teilhard De Chardin (Makers of the Modern Theological Mind) Doran McCarty, 1976 Pierre Teilhard de Chardin is one of those unusual men who fit no mold and cannot be easily labeled A complex and brilliant thinker he had a simple and mystical faith A Frenchman who loved his homeland he spent most of his life in China because he was not allowed by his superiors to teach in French As a Jesuit priest he held views on creation and evolution considered highly suspect and unorthodox yet he submitted humbly to his order's prohibition against teaching or publishing during his lifetime His profession palaeontology called on him to study the past but the greater portion of his thinking and writing has to do with the future the future of man and society Teilhard de Chardin is one of the few modern thinkers who have tried to integrate all phenomena into one system His first book *The Phenomenon of Man* published after his death took the reading public by storm because of its vast sweep and bold attempt to create a complex and cosmic system from both a scientific and a Christian point of view Doran McCarty's treatment of Teilhard covers all the important aspects of his life and thought Here you will find discussions of Teilhard's views on the nature of God the nature of man the structure of reality creation and evolution democracy and totalitarianism Here too are explanations of his unique terminology including centreism withinness Christogenesis Christophere noosphere the Omega Point Dr McCarty presents Teilhard's ideas in more traditional terms while still remaining faithful to the original complexity and terminology This is especially important since Teilhard never had a chance to refine his thought against the reaction and criticism of the scholarly world Dr McCarty's treatment is an excellent introduction for the person who wants to know more about Teilhard as well as being a useful and important study of this unique and influential thinker Publisher **Teilhard de Chardin** Doran MacCarty, 1976 Teilhard de Chardin Doran McCarty, 1991

Michael J. McClymond, 2018-06-05 2018 Book Award Winner The Gospel Coalition Academic Theology A Choice Outstanding Academic Title for 2019 Will all evil finally turn to good or does some evil remain stubbornly opposed to God and God's goodness Will even the devil be redeemed Addressing a theological issue of perennial interest this comprehensive book in two volumes surveys the history of Christian universalism from the second to the twenty first century and offers an interpretation of how and why universalist belief arose The author explores what the church has taught about universal salvation and hell and critiques universalism from a biblical philosophical and theological standpoint He shows that the effort to extend grace to everyone undermines the principle of grace for anyone

On the Origin of Consciousness Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration

Making All Things New Delio, Ilia, 2015-09-30 Ilia Delio introduces a new word catholicity which is destined to become as discussed and familiar in this century as the word Catholic was in the 2nd century As Delio demonstrates catholicity is a conscious awareness of how everything sun and stars maple trees and muddy rivers and all organisms from the single celled to homo sapiens forms one thing It is a dynamic spiritual quality that quite literally means becoming whole Catholicity is an inner principle which first burst forth in the life of Jesus and has the power to reconnect all the dimensions of life spirituality religion the new sciences culture and society Back cover *Cosmic Prayer and Guided Transformation* Robert

Govaerts, 2012-08-29 This book presents a realistic and thoroughly spiritual outlook upon the entire created reality It lets us envisage that various created entities are participant in a relationship with God that becomes increasingly one of an intimate personal quality that is a relationship of love It thus invites discernment that the universal reality is valuable in its own right and not only as a good for the use of humanity Drawing mainly upon Scripture ancient writers especially Maximus the Confessor as well as contemporary natural sciences this book encourages the reader to perceive human salvation not as a lifting of humanity out of creation but as a transformation into God's presence in the midst of the wider created order It shows that Christian faith at its best does not exclude the wider creation but provides us with insight and hope for a harmonious being in God that is inclusive of creation It shows that Christian faith can be a resource that helps overcome the ecological crisis *Living Cosmology* Tucker, Mary Evelyn, Grim, John, 2016-04-13 **The Study of Science and Religion**

Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is

contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan S derblom to the present Archbishop Antje Jackel n and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction *Minding God* Gregory R. Peterson, 2003 Does it make sense to speak of the mind of God Are humans unique Do we have souls Our growing explorations of the cognitive sciences pose significant challenges to and opportunities for theological reflection Gregory Peterson introduces these sciences neuroscience artificial intelligence animal cognition linguistics and psychology that specifically contribute to the new picture and their philosophical underpinnings He shows its implications for rethinking longstanding Western assumptions about the unity of the self the nature of consciousness free will inherited sin and religious experience Such findings also illumine our understanding of God s own mind the God world relationship new notion of divine design and the implications of a universe of evolving minds Peterson is gifted at explaining scientific concepts and drawing their implications for religious belief and theology His work demonstrates how new work in cognitive sciences upends and reconfigures many popular assumptions about human uniqueness mind body relationship and how we speak of divine and human intelligence

The Good Wine Bruno Barnhart, 2008-12-02 The Good Wine is an exciting and challenging overview of the gospel of John Bruno Barnhart has created a mystical roadmap of the biblical book which is often considered the most difficult and theological of the four gospels Following the lead of Peter Ellis Barnhart has organized the whole of John s gospel around a single truth that God poured divine reality into humankind through the person of Jesus Christ This belief stands at the center of the gospel and every episode in the narrative refracts the light of that core affirmation The gospel when interpreted this way assumes a mandalic pattern in which all parts are related to the center and through it to each other The mandalic pattern is also a gate of entry for believers who seek to relate their own destinies to the Source of Life This book differs from other treatments of John s gospel in that its method is sapiential following the wisdom tradition of the church fathers It explores the symbolic significance of the gospel and pays attention to chiasmic textures which establish patterned repetitive relationships between narrative episodes The result is a deeply spiritual work that explodes with flashes of illumination for persons who come to the gospel jaded with traditional scholarship Continental Philosophy and Modern Theology David Brown, 2012-01-18 The Gospel and Its Meaning Harry Lee Poe, 1996 The Gospel speaks to a broad range of concerns concerns that differ from person to person group to group culture to culture Yet the practice of the twentieth century church has been to concentrate on one part of the Gospel repentance and justification as if it were the whole and to proclaim that

part uniformly often without meaningful context that would demonstrate the relevance of Christ to the hearer The Gospel and Its Meaning breaks fresh ground for evangelism It equips the students of evangelism with theological foundations for reaching diverse groups from Hindi pantheists to radical environmentalists without compromising the Gospel s integrity The Gospel and Its Meaning Identifies the basic elements of the Gospel Shows the relationship of these elements to specific doctrines of theology Identifies theologians and systems that have focused on particular doctrines Shows which elements of the Gospel deal most clearly with various issues of evangelism Suggests avenues of ministry that can address each evangelistic issue By showing how different parts of the Gospel address the concerns of people within and without the Judeo Christian worldview The Gospel and Its Meaning helps those in any kind of evangelistic ministry to develop a means for connecting the Gospel directly to the world of the hearer while distinguishing it clearly from philosophies of relativism and pluralism

From Human to Posthuman Brent Waters, 2016-04-22 Technology is one of the dominant forces shaping the emerging postmodern world Indeed the very fabric of daily life is dependent upon various information communication and transportation technologies With anticipated advances in biotechnology artificial intelligence and robotics that dependence will increase Yet this growing dependence is accompanied with a deep ambivalence For many technology symbolises the faith of the postmodern world but it is an ambivalent faith encapsulating both our hopes and fears for the future This book examines the religious foundations underlying this troubled faith in technology as well as critically and constructively engaging particular technological developments from a theological perspective
